The internet bubble has collapsed and the largest bankruptcy in US history, Enron, has made the call for greater transparency in financial reporting more important than ever. Andrew Higson draws attention to what is a true and fair view in reporting and critically examines accounting theory and modern practice.

Financial analysis based on ratio analysis has been used as a tool for analyzing the financial strength of corporations. Although ratio analysis is generally used as a univariate strategy, the accounting and finance literature has evolved to include multivariate based models in financial analysis, and these models can be used to explain important economic events and often predict them. Thus, in an exhaustive coverage of the economic events to which they can be applied, Riahi Belkaoui discusses these models in a way that will have special value to corporate management, financial planners, and to their colleagues in the academic community who specialize in business and economic analysis.

Leasing is by far the most important source of finance for various types of assets needed by firms, but this may cause problems among them are the decisions to buy or lease and the accounting decisions to capitalize or expense. Riahi Belkaoui addresses both problems by examining the models and standards used both for management of and accounting for leases. In five chapters, Riahi Belkaoui covers the issues involved in leasing and financing decision models and offers a decision format to reconcile disagreements among various approaches to the lease or buy analysis. He examines all the techniques proposed for accounting for long term leases as formulated by the Statement of Accounting Standards No 13 and then looks at specific issues in his final chapter. A unique contribution to the literature on leasing, Riahi Belkaoui explores the economics of buying. This is a valuable resource for financial accountants, decision makers and researchers interested in the management of leases.
