leon krier is one of the best known and most provocative architects and urban theoreticians in the world until now however his ideas have circulated mostly among a professional audience of architects city planners and academics in the architecture of

community krier has reconsidered and expanded writing from his 1998 book architecture choice or fate here he refines and updates his thinking on the making of sustainable humane and attractive villages towns and cities the book includes drawings diagrams and photographs of his built works which have not been widely seen until now

leon krier s most important essays and all his projects including his proposals for poundbury near dorchester and masterplans for luxemburg s new quarter and washington dc and the new town of atlantis on the island of tenerife have been brought together in this work

this polemic is essential reading for anyone concerned with the state and direction of architecture and urban planning today and will provoke wide ranging discussion

drawings doodles and ideograms argue with ferocity and wit for traditional urbanism and architecture architect léon krier s doodles drawings and ideograms make arguments in images without the circumlocutions of prose drawn with wit and grace these clever sketches do not try to please or flatter the architectural establishment rather they make an impassioned argument against what krier sees as the unquestioned doctrines and unacknowledged absurdities of contemporary architecture thus he shows us a building bearing a suspicious resemblance to norman foster s famous london gherkin as an example of priapus hubris threatened by detumescence and priapus nemesis he charts random uniformity fake simplicity and uniform randomness fake complexity he draws bloated bulimic and disproportionately scrawny anorexic columns flanking a graceful classical one and he compares private virtue modernist architects homes and offices to public vice modernist architects creations krier wants these witty images to be tools for re founding traditional urbanism and architecture he argues for mixed use cities of architectural speech rather than architectural stutter and pointedly plots the man vehicle landneed ratio of sub urban man versus that of a city dweller in an age of energy crisis he writes and his drawings show we build in the wrong places in the wrong patterns materials densities and heights and for the wrong number of dwellers a return to traditional architectures and building and settlement techniques can be the means

of ecological reconstruction each of krier's provocative and entertaining images is worth more than a thousand words of theoretical abstraction

one of the most interesting questions in architectural history is why modern architecture emerged from the war ravaged regions of central europe and not the united states whose techniques of mass production and mechanical products so inspired the first generation of modern architects like le corbusier mies van der rohe and walter gropius in from autos to architecture historian david gartman offers a critical social history that shows how fordist mass production and industrial architecture in america influenced european designers to an extent previously not understood drawing on marxist economics the frankfurt school and french sociologist pierre Bourdieu from autos to architecture deftly illustrates the different class structures and struggles of america and europe examining architecture in the context of social conflicts from autos to architecture offers a critical alternative to standard architectural histories focused on aesthetics alone

bringing together leading writers and practicing architects including jean dethier david mayernik massimo scolari robert adam david watkin and leon krier this volume provides a kaleidoscopic multilayered exploration of the architectural capriccio it not only explains the phenomena within a historical context but moreover demonstrates its contemporary validity and appropriateness as a holistic design methodology an inspiring pictorial strategy an efficient rendering technique and an optimal didactic tool the book shows and comments on a wide range of historic masterworks and highlights contemporary artists and architects excelling in a modern updated refreshed and original tradition of the capriccio
