the myth of the twentieth century german der mythus des zwanzigsten jahrhunderts is a 1930 book by alfred rosenberg one of the principal ideologues of the nazi party and editor of the nazi paper volkischer beobachter the titular myth in the special sorelian sense is the myth of blood which under the sign of the swastika unchains the racial world revolution it is the awakening of the race soul which after long sleep victoriously ends the race chaos the book has been described as one of the two great unread bestsellers of the third reich the other being mein kampf in private adolf hitler said i must insist that rosenberg s the myth of the twentieth century is not to be regarded as an expression of the official doctrine of the party hitler objected to rosenberg s paganism

a fountainhead of fundamental precepts in the field of human history religion and cultural philosophy almost overwhelming in magnitude the myth is the myth of the blood which under the sign of the swastika released the world revolution it is the awakening of the soul of the race which after a period of long slumber victoriously put an end to racial chaos

this is the first book length critical analysis in any language of hans blumenberg s theory of myth blumenberg can be regarded as the most important german theorist of myth of the second half of the twentieth century and his work on myth 1979 has resonated across disciplines ranging from literary theory via philosophy religious studies and anthropology to the history and philosophy of science nicholls introduces anglophone readers to blumenberg s biography and to his philosophical contexts he elucidates blumenberg s theory of myth by relating it to three important developments in late nineteenth and early twentieth century german philosophy hermeneutics phenomenology and philosophical anthropology while also comparing blumenberg s ideas with those of other prominent theorists of myth such as vico hume schelling max müller frazer sorel freud cassirer heidegger horkheimer and adorno according to nicholls blumenberg s theory of myth can only be understood in relation to the human sciences since it emerges from a speculative hypothesis concerning the emergence of the earliest human beings for blumenberg myth was originally a cultural adaptation that constituted the human attempt to deal with anxieties concerning the threatening forces of nature by anthropomorphizing those forces into mythic images in the final two chapters blumenberg s theory of myth is placed within the post war political context of west germany through a consideration of blumenberg s exchanges with carl schmitt as well as by analysing unpublished correspondence and parts of the original work of myth manuscript that blumenberg held back from publication nicholls shows that blumenberg s theory of myth also amounted to a reckoning with the legacy of national socialism

regarded as the second most important book to come out of nazi germany alfred rosenberg s *Der Mythus des zwanzigsten Jahrhunderts* is a philosophical and political map which outlines the ideological background to the nazi party and maps out how that party viewed society other races social ordering religion art aesthetics and the structure of the state the mythus to which rosenberg who was also editor of the nazi party newspaper refers was the concept of blood which according to the preface unchains the racial world revolution rosenberg s no hold barred depiction of the history of christianity earned it the accusation that it was anti christian and that unjustified controversy overshadowed the most interesting sections of the book which deal with the world racial situation and the demand for racially homogenous states as the only method to preserve individual world cultures rosenberg was hanged at nuremberg on charges of waging wars of aggression even though he had never served in the military and it is likely that he was hanged purely because of this book

myth in the modern novel imagining the absolute posits a twofold thesis first although modernity is regarded as an era dominated by science and rational thought it has in fact not relinquished the hold of myth a more primitive form of

thought which is difficult to reconcile with modern rationality second some of the most important statements as to the reconcilability of myth and modernity are found in the work of certain prominent novelists this book offers a close examination of the work of eleven writers from the late eighteenth century to the beginning of the twenty first representing german french american czech and swedish literature the analyses of individual novels reveal a variety of intriguing views of myth in modernity and offer an insight into the modernizing transformations myth has undergone when applied in the modern novel the study shows the presence of the subconscious the mythic layer in modern western culture and how this has been dealt with in novelistic literature

regarded as the second most important book to come out of nazi germany alfred rosenberg's *Der Mythus des zwanzigsten Jahrhunderts* is a philosophical and political map which outlines the ideological background to the nazi party and maps out how that party viewed society other races social ordering religion art aesthetics and the structure of the state the mythus to which rosenberg who was also editor of the nazi party newspaper refers was the concept of blood which according to the preface unchains the racial world revolution rosenberg's no hold barred depiction of the history of christianity earned it the accusation that it was anti christian and that unjustified controversy overshadowed the most interesting sections of the book which deal with the world racial situation and the demand for racially homogenous states as the only method to preserve individual world cultures rosenberg was hanged at nuremberg on charges of waging wars of aggression even though he had never served in the military and it is likely that he was hanged purely because of this book contents preface book one the conflict of values chapter i race and race soul chapter ii love and honour chapter iii mysticism and action book two nature of germanic art chapter i racial aesthetics chapter ii will and instinct chapter iii personality and style chapter iv the aesthetic will book three the coming reich chapter i myth and type chapter ii the state and the sexes chapter iii folk and state chapter iv nordic german law chapter v church and school chapter vi a new system of state chapter vii the essential unit

myths are a central part of our reality but merely debunking them lets us forget why they are created in the first place and why we need them andré fischer draws on key examples from german postwar culture from novelists hans henry jahn and hubert fichte to sculptor and performance artist joseph beuys and filmmaker werner herzog to show that mythmaking is an indispensable human practice in times of crisis against the background of mythologies based in nineteenth century romanticism and their ideological continuation in nazism fresh forms of mythmaking in the narrative visual and performative arts emerged as an aesthetic paradigm in postwar modernism boldly rewriting the cultural history of an era and setting in transition the aesthetics of mythmaking in german postwar culture counters the predominant narrative of an exclusively rational *vergangenheitsbewältigung* coming to terms with the past far from being merely reactionary the turn toward myth offered a dimension of existential orientation that had been neglected by other influential aesthetic paradigms of the postwar period fischer's wide ranging transmedia account offers an inclusive perspective on myth

beyond storytelling and instead develops mythopoesis as a formal strategy of modernism at large

in an intriguing and provocative book an important thesis an important addition to libraries serving both academic and general readers choice

regarded as the second most important book to come out of nazi germany this book is a philosophical and political map which outlines the ideological background to the nazi party and maps out how that party viewed society other races social ordering religion art aesthetics and the structure of the state the mythus to which rosenberg refers was the concept of blood which according to the preface unchains the racial world revolution rosenberg's no hold barred depiction of the history of christianity earned it the accusation that it was anti christian and that unjustified controversy overshadowed the most interesting sections of the book which deal with the world racial situation and the demand for racially homogeneous states as the only method to preserve individual world cultures rosenberg was hanged at nuremberg on charges of waging wars of aggression even though he had never served in the military and it is likely that he was hanged purely because of this book
