in this thoughtful meticulously researched book professor blum makes a major contribution to the exposure of an important aspect of un practice he adds to his academic analysis the insight provided by his years as his country s ambassador at the un provides the reader with a fascinating well written argument the book reflects events developments that took place prior to the summer of 1990 during the period marked by global confrontation between the two major power blocs of those days that confrontation found one of its strongest expressions in the united nations was largely responsible for the deterioration of the legal constitutional climate within the un with the end of that confrontation as a result of the collapse of the former soviet bloc the disintegration of the soviet union itself a new climate of parliamentary cooperation within the united nations has come about consequently there would now appear to

exist a real prospect perhaps for the first time since the establishment of the organization for a reconsideration of at least some of the practices that developed over the years within the cold war context which constitute a departure from the legal constitutional requirements laid down by the charter it is in this spirit this book is offered to the reader s attention

this novel and original book examines and disaggregates theoretically and empirically operations of power in international security regimes these regimes varying in degree from regulatory to prohibitory are understood as sets of normative discourses political structures and dependencies anarchies hierarchies and heterarchies and agencies through which power operates within a given security issue area with a regulatory effect in international relations regime analysis has been dominated by several generations of regime theory theorization as this book makes clear not only has the ir regime theory been of limited utility for security domain due to its heavy focus on economic and environmental regimes but it too heuristically suffered from its rigid pegging to general ir theory it is not surprising then that the evolution of ir regime theory has largely been mirroring the evolution of ir theory in general from the neo realist neo liberal institutionalist convergence regime theory through cognitivism to constructivist regime theory the commitment of this book is to remedy this situation by bringing together robust power analysis and international security regimes it provides the reader with a theoretically and empirically uncompromising and comprehensive analysis of the selected international security regimes which goes beyond one or another school of ir regime theory in doing so it completely abandons existing and piecemeal analysis of regimes within the intellectual field of ir based on conventional grand mid range theorization

this book examines the world trade organization wto in the context of the global economy in the twenty first century arguing that many problems within the institution lie in the disparity between its design and the nature of its tasks studying the global trade regime and the unsuccessful doha round of trade liberalization negotiations this volume suggests that important institutional adjustments may be necessary for the wto and other major international institutions to re gain their ability to manage global economy it uses extensive new qualitative and quantitative evidence to identify systematic dysfunctions in how the doha negotiations have been conducted and links these dysfunctions to the exclusively inter governmental design of interest representation in the wto based on this

the book argues that global economic institutions should consider allowing broader parliamentary and non state representation of their members presenting findings which can also be applied to other global economic institutions negotiations in the world trade organization will be useful to students and scholars of international trade global governance and international political economy

this book analyzes the challenges citizens face obtaining remedies and reparation for harm suffered as a result of the actions of international organizations it encourages reflection on additional measures to strengthen accountability
