arete and the odyssey's poetics of interrogation explores how the enigmatic phaeacian queen arete is at the heart of an epic scale poetics of interrogation used throughout the odyssey to negotiate odysseus' kleos or epic renown. arete's interrogation of odysseus has been especially problematic in scholarship but diachronic and synchronic analysis of similar interrogations across indo-european orphic and greek epigrammatic corpora show that the stranger's interrogation is a formula that demands performance and negotiation of status within the odyssey. this interrogation is part of an intraformular network used to generate kleos and the queen's question initiates the longest and most complex negotiation of odysseus' status in epic and memory. arete's role as interrogator not only explains her strange authority and resonance with both penelope and comparative afterlife figures but it also establishes a gendered agonistic tension between she and her husband alcinous that influences the structure, genre, and narratology of performances across the phaeacian episode. this book reinterprets the odyssey's central episode and challenges several assumptions about nausikaa and alcinous' famed hospitality, even demonstrating how the apologue is organized as a response to competing inquiries into odysseus' fundamental status in tradition. the odyssey ultimately navigates away from odysseus' public reputation and roots his status in private memories, and arete's carefully arranged interventions signal the larger process by which the odyssey immortalizes odysseus in poetry as a nostos hero. the queen and her question invite new applications of oral poetics that shed light on the structure, composition, and reperformance of the odyssey.

this book presents a collection of critical thinking that concerns cultural, social, and political issues for science education in the nordic countries. the chapter authors describe specific scenarios to challenge persisting views, interrogate frameworks, and trouble contemporary approaches to researching teaching and learning in science, taking a point of departure in empirical examples from the nordic countries. the collection of work is taking a critical sideways glance at the nordic education principles. critical examinations target specifically those who are researching in the fields of science education research to question whether conventional research approaches, foci, and theoretical approaches are sufficient in a world of science education that is neither politically neutral nor free of cultural values. attention is not only on the individual learner but on the cultural, social, and political conditions and contexts in science education. the different chapters review debates and research in teacher education, school teaching and learning, including when external stakeholders are involved. even though the chapters are contextualized in nordic settings, there will be similarities and parallels that will be informative to the international science education research community.

this three volume commentary also includes an introduction discussing previous research on the odyssey its relation to the iliad the epic dialect and the transmission of the text
