from an award winning neuroscience researcher with twenty years  
of teaching experience multiple pathways to the student brain  
uses educator friendly language to explain how the brain learns  
steering clear of neuro myths dr janet zadina discusses  
multiple brain pathways for learning and provides practical  
advice for creating a brain compatible classroom while there  
are an abundance of books and workshops that aim to integrate  
education and brain science educators are seldom given concrete  
actionable advice that makes a difference in the classroom  
multiple pathways to the student brain bridges that divide by  
providing examples of strategies for day to day instruction  
aligned with the latest brain science the book explains not  
only the sensory motor pathways that are familiar to most  
educators visual auditory and kinesthetic it also explores the  
lesser known pathways reward survival language social emotional  
frontal lobe and memory attention and how they can be tapped to

energize and enhance instruction educators are forever searching for new and improved ways to convey information and inspire curiosity and research suggests that exploiting different pathways may have a major effect on learning multiple pathways to the student brain allows readers to see brain science through the eyes of a teacher and teaching through the eyes of a brain scientist

the united states has publicly funded its human spaceflight program on a continuous basis for more than a half century through three wars and a half dozen recessions from the early mercury and gemini suborbital and earth orbital missions to the lunar landings and thence to the first reusable winged crewed spaceplane that the united states operated for three decades today the united states is the major partner in a massive orbital facility the international space station that is becoming the focal point for the first tentative steps in commercial cargo and crewed orbital space flights and yet the long term future of human spaceflight beyond this project is unclear pronouncements by multiple presidents of bold new ventures by americans to the moon to mars and to an asteroid in its native orbit have not been matched by the same commitment that accompanied president kennedy s now fabled 1961 speech namely the substantial increase in nasa funding needed to make it happen are we still committed to advancing human spaceflight

what should a long term goal be and what does the united states need to do to achieve it pathways to exploration explores the case for advancing this endeavor drawing on the history of rationales for human spaceflight examining the attitudes of stakeholders and the public and carefully assessing the technical and fiscal realities this report recommends maintaining the long term focus on mars as the horizon goal for human space exploration with this goal in mind the report considers funding levels necessary to maintain a robust tempo of execution current research and exploration projects and the time resources needed to continue them and international cooperation that could contribute to the achievement of spaceflight to mars according to pathways to exploration a successful u s program would require sustained national commitment and a budget that increases by more than the rate of inflation in reviving a u s human exploration program capable of answering the enduring questions about humanity s destiny beyond our tiny blue planet the nation will need to grapple with the attitudinal and fiscal realities of the nation today while staying true to a small but crucial set of fundamental principles for the conduct of exploration of the endless frontier the recommendations of pathways to exploration provide a clear map toward a human spaceflight program that inspires students and citizens by furthering human exploration and discovery while taking into account the long term commitment necessary to achieve this goal
