it is essential for today's students to learn about science and engineering in order to make sense of the world around them and participate as informed members of a democratic society the skills and ways of thinking that are developed and honed through engaging in scientific and engineering endeavors can be used to engage with evidence in making personal decisions to participate responsibly in civic life and to improve and maintain the health of the environment as well as to prepare for careers that use science and technology the majority of americans learn most of what they know about science and engineering as middle and high school students during these years of rapid change for students knowledge attitudes and interests they can be engaged in learning science and engineering through schoolwork that piques their curiosity

about the phenomena around them in ways that are relevant to their local surroundings and to their culture many decades of education research provide strong evidence for effective practices in teaching and learning of science and engineering one of the effective practices that helps students learn is to engage in science investigation and engineering design broad implementation of science investigation and engineering design and other evidence based practices in middle and high schools can help address present day and future national challenges including broadening access to science and engineering for communities who have traditionally been underrepresented and improving students educational and life experiences science and engineering for grades 6 12 investigation and design at the center revisits america s lab report investigations in high school science in order to consider its discussion of laboratory experiences and teacher and school readiness in an updated context it considers how to engage today s middle and high school students in doing science and engineering through an analysis of evidence and examples this report provides guidance for teachers administrators creators of instructional resources and leaders in teacher professional learning on how to support students as they make sense of phenomena gather and analyze data information construct explanations and design solutions and communicate reasoning to self and others during science investigation and engineering design it also provides guidance to help educators get started with designing implementing and assessing investigation and design

what questions should i ask my doctor about my diagnosis how do i tell my children i have breast cancer what types of breast biopsies are there do i have a choice between mastectomy and lumpectomy where can i find a breast cancer support group as a longtime volunteer at the women s cancer resource center certified breast health educator charyn pfeuffer has been on the front lines providing clear authoritative answers to patients and caregivers for the one hundred most frequently asked questions about everything from testing to treatment now in response to the urgent concerns of breast cancer patients and their families pfeuffer draws on the expertise of traditional and alternative health care practitioners to create this comprehensive accessible survival manual the book also features the most up to date information on medical terminology support groups and resource centers cancer medication and complementary and alternative therapies this is the book every woman will need to make informed decisions about her own treatment and recovery book jacket

a new york times notable book as late as 1999 women who succeeded in science were called exceptional as if it were unusual for them to be so bright they were exceptional not because

they could succeed at science but because of all they accomplished despite the hurdles gripping one puts down the book inspired by the women's grit tenacity and brilliance science riveting siddhartha mukherjee author of the gene in 1963 a female student was attending a lecture given by nobel prize winner james watson then tenured at harvard at nineteen she was struggling to define her future she had given herself just ten years to fulfill her professional ambitions before starting the family she was expected to have for women at that time a future on the usual path of academic science was unimaginable but during that lecture young nancy hopkins fell in love with the promise of genetics confidently believing science to be a pure meritocracy she embarked on a career in 1999 hopkins now a noted molecular geneticist and cancer researcher at mit divorced and childless found herself underpaid and denied the credit and resources given to men of lesser rank galvanized by the flagrant favoritism hopkins led a group of sixteen women on the faculty in a campaign that prompted mit to make the historic admission that it had long discriminated against its female scientists the sixteen women were a formidable group their work has advanced our understanding of everything from cancer to geology from fossil fuels to the inner workings of the human brain and their work to highlight what they called 21st century discrimination a subtle stubborn often unconscious bias set off a national reckoning with the pervasive sexism in science from the pulitzer prize winning journalist who broke the story the exceptions chronicles groundbreaking science and a history making fight for equal opportunity it is the excellent and infuriating the new york times story of how this group of determined brilliant women used the power of the collective and the tools of science to inspire ongoing radical change and it offers an intimate look at the passion that drives discovery and a rare glimpse into the competitive hierarchical world of elite science and the women who dared to challenge it

people have searched for the fountain of youth everywhere from bimini to st augustine but for a steadfast group of scientists the secret to a long life lies elsewhere in the lowly lab worm by suppressing the function of just a few key genes these scientists were able to lengthen worms lifespans up to tenfold while also controlling the onset of many of the physical problems that beset old age as the global population ages the potential impact of this discovery on society is vast as is the potential for profit with the longevity seekers science writer ted anton takes readers inside this tale that began with worms and branched out to snare innovative minds from california to crete investments from big biotech and endorsements from tv personalities like oprah and dr oz some of the research was remarkable such as the discovery of an enzyme

in humans that stops cells from aging and some like an oft cited study touting the compound resveratrol found in red wine proved highly controversial igniting a science war over truth credit and potential profit as the pace of discovery accelerated so too did powerful personal rivalries and public fascination driven by the hope that a longer healthier life was right around the corner anton has spent years interviewing and working with the scientists at the frontier of longevity science and this book offers a behind the scenes look at the state of the art research and the impact it might have on global public health society and even our friends and family with spectacular science and an unforgettable cast of characters the longevity seekers has all the elements of a great story and sheds light on discoveries that could fundamentally reshape human life

this book offers a complete discussion of product development in the pharmaceutical and biotechnology industries from discovery to product launch through life cycle management the book is organized for optimal usefulness in the education and training of health care professionals md pharmd phd at universities the format is a set of figures tables and lists along with detailed narrative descriptions including real life examples illustrations controversies in industry and references the editors and authors of the book are industry and research experts in a variety of disciplines

the complete guide to people salaries companies products technologies and forecasts in the fascinating ever changing computer industry
