audience Case Studies in Sustainable Communication Martin Mulligan's work often involves collaborating with businesses deeply committed to environmental responsibility. Take for example his campaign for a company that uses recycled materials in its products. Instead of simply stating the material composition, Mulligan crafted a compelling narrative about the positive environmental impact. He highlighted the reduced carbon footprint, the preservation of natural resources, and the opportunity to create new value from waste. The resulting copy resonated deeply with environmentally conscious consumers.

The Power of Data and Transparency

Effective sustainability copywriting isn't just about emotion; it's about backing claims with concrete evidence. Mulligan often utilizes data to support his messaging, showcasing a company's progress towards sustainability goals and quantifying its achievements. Transparency builds trust, and in a world drowning in marketing claims, this kind of demonstrable proof is invaluable.

papua new guinea is going through a crisis a concentration on conventional approaches to development including an unsustainable reliance on mining forestry and foreign aid has contributed to the country s slow decline since independence in 1975 sustainable communities sustainable development attempts to address problems and gaps in the literature on development and develop a new qualitative conception of community sustainability informed by substantial and innovative research in papua new guinea in this context sustainability is conceived in terms that

include not just practices tied to economic development it also informs questions of wellbeing and social integration community building social support and infrastructure renewal in short the concern with sustainability here entails undertaking an analysis of how communities are sustained through time how they cohere and change rather than being constrained within discourses and models of development from another angle this project presents an account of community sustainability detached from instrumental concerns with economic development contributors address questions such as what are the stories and histories through which people respond to their nation s development what is the everyday social environment of groups living in highly diverse areas migrant settlements urban villages remote communities they seek to contribute to a creative and dynamic grass roots response to the demands of everyday life and local global pressures while the overdeveloped world faces an intersecting crisis created by global climate change and financial instability papua new guinea with all its difficulties still has the basis for responding to this manifold predicament its secret lies in what has been seen as its weakness underdeveloped economies and communities where people still maintain sustainable relations to each other and the natural world

contemporary changes in law and policy at the global level to efficiently answer to environmental and social issues correspond to the traditional approach of limiting the regulatory and policy changes to a singular field or discipline tackling the inherent unsustainability of corporate laws or incentivising the offering of sustainable finance to stimulate the transition towards sustainable practices this book provides a new viewpoint and approach of simultaneously regulating seemingly non connected fields in order to provide a fertile ground for a truly organic change towards sustainable outcomes it addresses diverse questions of sustainable transition of the three specific fields to support sustainable practices in public procurement private market transaction and in educating future business leaders and legal experts by incorporating

sustainable concerns as the underlying guiding principles of their conduct it translates scientific findings into a practical format that can be used by diverse stakeholders searching for information and solutions in their respective professional fields the underlying assumption is that a simultaneous action in the three respective fields of public procurement corporate law and higher education brings about more coherent and interconnected results that incentivise further action and changes towards sustainable practices the book furthers the idea of policy coherence by building upon the findings in the field of public procurement corporate law and practice and higher education curricula by identifying the barriers in the three respective fields for sustainable action and proposing solutions for either eliminating or minimising those barriers at the eu level the book calls for further changes in the respective fields as well as for considering the spillover effects of these policies on other fields

the culmination of over three decades of writing by environmental scientist and writer haydn washington this book examines the global environmental crisis and its solutions many of us know that something is wrong with our world that it is wounded at the same time we often don t know why things have gone wrong or what can be done framing the discussion around three central predicaments the ecological the social and the economic washington provides background as to why each of these are in crisis and presents steps that individuals can personally take to heal the world urging the reader to accept the reality of our problems he explores practical solutions for change such as the transition to renewable energy rejection of climate denial and the championing of appropriate technology as well as a readjustment in ethical approaches the book also contains 19 solution boxes by distinguished environmental scholars with a focus on positive personal solutions this book is an essential read for students and scholars of environmental science and environmental philosophy and for all those keen to heal the world and contribute towards a sustainable future

ecocriticism and environmental communication studies have for many years co existed as parallel disciplines occasionally crossing paths but typically operating in separate academic spheres these fields are now rapidly converging and this handbook aims to reinforce the common concerns and methodologies of the sibling disciplines the routledge handbook of ecocriticism and environmental communication charts the history of the relationship between ecocriticism and environmental communication studies while also highlighting key new paradigms in information studies diverse examples of practical applications of environmental communication and textual analysis and the patterns and challenges of environmental communication in non western societies contributors to this book include literary film and religious studies scholars communication studies specialists environmental historians practicing journalists art critics linguists ethnographers sociologists literary theorists and others but all focus their discussions on key issues in textual representations of human nature relationships and on the challenges and possibilities of environmental communication the handbook is designed to map existing trends in both ecocriticism and environmental communication and to predict future directions this handbook will be an essential reference for teachers students and practitioners of environmental literature film journalism communication and rhetoric and well as the broader meta discipline of environmental humanities

winner of the john templeton award for theological promise 2009 this book argues that the christian doctrine of creatio ex nihilo sets up a support system for a logic of domination over others it follows a genealogical method in examining how the concept of creation out of nothing materializes in the world throughout different periods in the history of the christian west

we live in a time where environmental pressures social inequities and political derision are the backdrop of everyday life and where resilience has become a routine prescription for coping with

the conditions of modern existence drawing an analogy to harvey molotch s urban growth machine this book explores different narratives of resilience and their policy and practice manifestations for cities citizens and communities it expands on the metaphor of the machine to show how resilience can be better understood as an assemblage bringing together authors from multiple disciplines and different parts of the world the book unmasks the often invisible effects of resilience strategies by examining ways in which neoliberal mentalities are fed through the rhetoric of resilience practices policies and development projects the contributing essays provide provocative accounts of several areas of inquiry including biopolitics and smart bodies resilient cities and communities urban planning and disaster management justice and vulnerability and resistance to resilience holding out hope for critical potentials in resilience the resilience machine proposes to move beyond mechanisms of adaptation and into imagining what resilient life could look like in a more just equitable and democratic world the resilience machine is a current vital addition to resilience community and urban scholarship

during the last decade interest in growth theory in the context of the environment has increased dramatically resulting in a vast array of articles and books applying different modelling approaches and focusing on a variety of diverse topics dealing with endogenous growth under environmental restrictions karen pittel provides a comprehensive survey of the field and highlights some important issues that have so far been rather neglected within the debate on sustainable growth the book begins with a thorough review of the concepts of sustainable development and growth based upon the findings of this review the focus shifts towards the specifics of integrating environmental concerns into endogenous growth models which reveals some interesting new insights three particular facets of the environment growth debate are then studied in detail the role of recycling in the quest for sustainable growth the implications of endogenous time preference the effects of economic integration on growth and pollution this well written and

accessible book provides an extensive introduction to the issues of sustainability and endogenous growth enhanced by a comprehensive review of the associated literature it will be required reading for environmental economists ecological economists students and academics interested in sustainable development and growth and growth theorists concerned with environmental issues

where now for postcolonial studies that is the central question in this new volume from one of the field's most original thinkers huggan's answer is interdisciplinarity and here he sets out a series of conversations between literary studies and other disciplines notably geography environmental studies history and anthropology huggan aims to establish an alternative trajectory through the field of postcolonial literary cultural studies that is alert to similar kinds of work being done in and across other disciplines and reflects on possible futures for postcolonial studies that move beyond
