lise couture has been in the field of ear acupuncture for the last twentyseven years and her work is known in many countries including canada france argentina uruguay u s a spain and many others by the token of the conferences she gave at the Lyon symposium in 1994 and in 2006 she was also a guest speaker at the first chinese symposium in toronto in may of 1986 in 2006 she heard about dr ulrich werths method with the implants in the ears for treating parkinsons it reminded her dr paul nogiers words in one of the auricular magazines one day while treating a man in his clinic he related that he would have liked to crible the point with many needles rather than only one the situation was really chronic and the patient needed help in her practice she had experienced that feeling too and she is amazed that dr werth came out with those microimplants inserted in different points of the ear to stop or slow down the destructive process of the parkinsons dr lise is now in her third year of practice and research in the field of ear acupuncture and parkinson at the same time she keeps treating her regular patients but at a lower rythm like dr paul nogier she is all ears to the stories of her patients the answer of the healing is in their life experiences that is her truth and living passion if she can have you walk shell do it dr lise lives in ottawa with her son dannie and husband michel andrbeauvolsk since 1992

endometriosis is a chronic health complaint that is experienced by up to 10 of women of reproductive age endometriosis results in significant psychological and financial burden

surgical and pharmacological management can alleviate symptoms but recurrence of endometriosis within one year is common many women use complementary and alternative therapies when the response to conventional medical treatments is inadequate the latest book in the evidence based clinical chinese medicine series uses a whole evidence approach to summarise the management of endometriosis with chinese medicine treatments the current understanding of endometriosis including symptoms diagnosis and treatment is summarised from conventional medicine and chinese medicine perspectives next a systematic approach is used to understand how endometriosis was treated with chinese medicine in past eras internationally recognised scientific methods are used to identify and evaluate the clinical evidence for chinese herbal medicine acupuncture and related therapies the potential mechanisms of herbal medicines are identified from experimental studies the final chapter synthesises the evidence from the different literature sources and offers suggestions for contemporary clinical practice and future research this book is a handy desktop reference for both clinicians and students of chinese and integrative medicine it provides a comprehensive synthesis of both traditional and contemporary knowledge that can inform clinical decision making

the spectrum of addiction disorders presents practitioners with numerous challenges among them the widening gap between a growing evidence base and the translation of this knowledge into treatment outcomes addiction medicine addresses this disconnect clearly explaining the role of brain function in drug taking and other habit forming behaviors and applying this biobehavioral framework to the delivery of evidence based treatment its state of the art coverage provides clinically relevant details on not only traditional sources of addiction such as cocaine opiates and alcohol but also more recently recognized substances of abuse e g steroids inhalants as well as behavioral addictions e g binge eating compulsive gambling hoarding current behavioral and medical therapies are discussed in depth and the book s close attention to social context gives readers an added lens for personalizing treatment an international panel of expert contributors offers the most up to date information on diagnosis and classification neurobiological and molecular theories of addiction behavioral concepts of addiction clinical aspects of addiction to a wide range of substances including opiates stimulants sedatives hallucinogens alcohol nicotine and caffeine science based treatment options pharmacotherapy pharmacogenetics potential vaccines brief and compliance enhancing interventions cognitive behavioral treatment behavioral management and other psychosocial interventions behavioral addictions including compulsive eating internet messaging and hypersexuality and their treatment addiction in specific populations including adolescents the elderly pregnant women and health care professionals legal disability and rehabilitation issues at once comprehensive and integrative addiction medicine is an essential text and a practice expanding tool for psychiatrists health psychologists pharmacologists social workers drug counselors trainees and general physicians family practitioners

ear acupuncture explores the practice of auriculotherapy a technique rooted in traditional chinese medicine where stimulating specific ear points can trigger healing responses throughout the body this book explains how the ear functions as a microsystem reflecting

the entire body and it highlights the therapeutic potential for stress relief pain management and enhanced mental clarity without relying on pharmaceutical interventions notably auriculotherapy s modern form was significantly developed by dr paul nogier who identified correlations between ear points and anatomical locations the book begins with the history and theory behind ear acupuncture then presents a detailed map of ear acupoints and their corresponding body parts it progresses to therapeutic protocols for common issues like anxiety and digestive disorders culminating in advanced techniques and case studies by bridging theory and practice ear acupuncture provides a practical guide for both healthcare professionals and individuals interested in alternative therapies

chinese auricular acupuncture provides students and practitioners with a clear concise and user friendly manual on ear acupuncture it reduces the need for memorization by presenting a method of ear acupuncture that is in keeping with the underpinnings of traditional chinese medicine the book can be independently studied and easily used to treat various diseases it covers ear modalities such as needles press tacks seeds and incorporates actual cases from clinical practice to illustrate the clinical applicability of specific modalities and ear acupuncture points a section on ear diagnosis allows you to supplement your assessment of the pulse tongue and hara thus improving your ability to differentiate the functional basis of imbalance and illness this edition includes five new chapters on the multiple use of auricular points prescriptionology practice common ear questions new research and ethical issues it contains detailed tables and photographs that aid understanding and includes an extensive and updated bibliography the greatest strength of this book is its user friendliness which allows both the beginning student and the experienced practitioner to successfully apply auricular medicine in the treatment of their patients in a caring relatively noninvasive and effective manner

this is the first comprehensive modern textbook of ear acupuncture the author uniquely combines his extensive personal clinical experience with traditional and modern chinese and european sources anatomical descriptions with detailed charts clearly illustrate how to locate and use over three hundred ear points both alone and in combination with body points to treat and prevent illness case histories with specific techniques cover problems such as deafness otitis otalgia drug addiction tobacco addiction alcoholism obesity anaesthesia oedema insomnia acupuncture electronic acupuncture devices an incredible repertory listing 130 diseases facilitates an understanding of this incredible and valuable healing art

although most of the world approaches auricular therapy from a simplistic single phase model understanding the advanced phases 2 and 3 are critical to improving patient response especially in chronic inflammatory and degenerative conditions further understanding the concepts of advanced auricular therapy enables the clinician to enhance his her understanding of the patient s pathophysiology and thus to approach the patient as a true clinician rather than as simply a technician

there is a large increase in interest in acupuncture by health care consumers the three

main reasons for this are medical effectiveness cost effectiveness and the credibility that clinical trials and physiological research have provided acupuncture is rapidly moving out of the arena of alternative medicine in large part again because it is grounded more firmly than other alternative treatments in research the book provides the reader with the up to date information on the clinical bases of acupuncture
