this book specifically developed for students of psychology covers a wide range of topics in statistics and research designs taught in psychology in particular and other disciplines like management sociology education home science and nutrition in general in most universities it explains how to use excel to analyze research data by elaborating statistical concepts each chapter contains sections like

check your computing skill and check your statistical concepts to enable students to assess their knowledge in a graded manner the book addresses one of the major challenges in psychology research viz how to measure subjective phenomenon like attitude desire and preferences of an individual separate emphasis has been given to the measurement techniques which are essential tools to assess these subjective parameters in numerical form required for statistical analysis to draw meaningful conclusions the book is equally helpful to students of humanities life sciences and other applied areas consisting of 14 chapters the book covers all relevant topics of statistics and research designs which are important for students to plan and complete their research work

in textbooks and courses in statistics substantive and measurement issues are rarely if at all considered similarly textbooks and courses in measurement virtually ignore design and analytic questions and research design textbooks and courses pay little attention to analytic and measurement issues this fragmentary approach fosters a lack of appreciation of the interrelations and interdependencies among the various aspects of the research endeavor pedhazur and schmelkin s goal is to help readers become proficient in these aspects of research and their interrelationships and to use that information in a more integrated manner the authors offer extensive commentaries on inputs and outputs of computer programs in the context of the topics presented both the organization of the book and the style of presentation allow for much flexibility in choice sequence and degree of sophistication with which topics are dealt

an introduction to the system data definition and management data analysis and reporting

a practical text intended as an introduction to ibm spss statistics 20 and a guide for windows users who wish to conduct analytical procedures features extensive use of screen displays and a range of step by step working and practice examples spiral bound to ensure ease of use at the computer

this book presents research that seeks to understand students experiences of transnational mobility and transcultural interaction in the context of educational settings confronted with linguistic diversity

this second edition updates the methods based on new technologies updates and increases the number of examples and reorganizes so the theoretical material is up front the author s decisions were guided by having used the first edition in classes at two universities consequently he received feedback on the book from a variety of different perspectives from groups of very conscientious and competent students and from colleagues around the world who have used the book by consensus the most popular aspect of the first edition was the organization of the book where the student researcher is guided through conceptualizing designing implementing and writing up the research project this basic organization is the same as in the first edition however within this organizational frame things have changed the discussion of the place of direct observational methods in relation to different qualitative and quantitative research traditions has been kept but expanded discussions of the use of direct observations in naturalistic settings drawing from research methods in ethology and ethnography and in more contrived settings drawing from experimental psychology are extended

relatedly an extended discussion has been added on theories of science guiding different research assumptions in addition sections of validity reliability and the ethics surrounding the research enterprise are also expanded these constructs are not specific to observational methods but relevant to the general research process in revised chapters in these areas the author provides grounding in the general concepts and then draws more specific focus to observational methods the extended discussion of ethics is important since issues related to who gets authorship on papers how to complete institutional review board forms and honesty in reporting findings are all issues that face both junior and senior researchers alike practical issues of writing research papers are expanded in this edition providing discussions of writing both review and empirical articles lastly a new and extensive chapter on using technology in direct observational methods has been added which reviews the available hardware and software in direct observational methods

this book offers a self contained guide to advanced algorithms and their applications in various fields of science gathering contributions by authoritative researchers in the field of mathematics statistics and computer science it aims at offering a comprehensive and up to date view of algorithms including the theory behind them as well as practical considerations current limitations and solutions it covers applications in energy management decision making computer networks materials science mechanics and process optimization it offers an integrated and timely guide to important algorithms and represents a valuable reference resource for graduate students and researchers in various fields of applied mathematics statistics and engineering

this book focuses on cultural tourism as it develops into the second decade of the new millennium it presents recent hospitality and tourism research findings from various sources including academic researchers and scholars industry professionals government and quasi government officials and other key industry practitioners it discusses the latest tourism industry trends and identifies gaps in the research from a pragmatic and applied perspective it includes specific chapters on innovation in tourism the virtual visitor cross cultural visions of digital collections heritage and museum management in the digital era cultural and digital tourism policy marketing and governance social media emerging technologies and e tourism and many other topics of contemporary significance in global hospitality and tourism the book is edited in collaboration with the international association of cultural and digital tourism iacudit and includes the proceedings of the second international conference on cultural and digital tourism

this three volume set ccis 2345 2347 constitutes the revised selected papers from the 4th international conference on advanced research in technologies information innovation and sustainability 2024 artiis 2024 held in santiago de chile chile during october 21 23 2024 the 83 full papers and 8 short papers included in these proceedings were carefully reviewed and selected from 238 submissions these papers are categorized under the following topical sections part i computing solutions part ii data intelligence part iii sustainability ethics security and privacy

aimed at graduate students and the faculty members who supervise them this text describes skills and strategies helpful in the various stages of the dissertation writing process the 20 contributions from farmer education pennsylvania state u rojewski occupational studies u of georgia and other academics discuss such topics as finding a researchable topic conducting an extensive review of the literature designing quantitative research analyzing data proofreading and editing annotation copyrighted by book news inc portland or
