starting with a selection of classical articles on international institutions this book traces the evolution of regime analysis over the last two decades as a new perspective on international governance in the process it provides a full account of the major schools of thought that have arisen to account for the demand for international governance the formation of international regimes and the effectiveness of international governance systems by drawing a clear distinction between institutions and organizations and then analysing the relationship between the two the book clarifies the concept of governance without government a number of essays explore the probable impact of the proliferation of international regimes on the character of international society the book s concluding section takes stock of the current status of regime and analyses and assesses emerging challenges in this vibrant field of study

the profound political changes in the ussr and eastern europe during 1989 have forced the united states and its western european allies to reevaluate both their long held military strategy of nuclear deterrence and the traditional role of nato in european affairs in this volume stephen cimbala considers the ways in which american military priorities will have to change now that the tangible threat to europe has been removed exploring the options available to america and nato given the new political and economic realities in europe and the soviet union drawing upon a rich literature of soviet and american defense strategy cimbala examines the structure and effectiveness of deterrence as a military strategy the relationship between conventional and nuclear weapons the likely course of future conflicts and alternative military strategies following an introductory chapter which defines the concepts of deterrence and dissuasion and offers an overview of the changing character of

European politics Cimbala reviews the political context for the development of military strategy in Europe. Subsequent chapters consider the relationship between military stability and the likelihood of winning wars in their initial stages, analyze the issue of deterrence during war, discuss the potential for atypical wars in the future, and investigate the linkages between deception and deterrence. A separate chapter addresses the attempt to substitute non-nuclear dissuasion for nuclear deterrence in the form of anti-nuclear strategic defenses which could defeat nuclear offenses. In the final chapter, Cimbala summarizes his conclusions and makes some additional observations about the implications of our new view of NATO and deterrence. Students of international relations, foreign policy, and military studies will find Cimbala's work enlightening and provocative reading.

This two-volume comprehensive guide is organized around the assumption that national and international security and arms control studies are interdisciplinary in nature. Volume 2 clarifies and defines selected current issues and problems from an international perspective. The chapters look at the scope of the emerging field of security and arms control studies as a serious field of systematic inquiry; they serve as a critical review and evaluation of the most important literature within each sub-field. The chapters identify major problems, key concepts, methods, disciplinary approaches, intellectual styles, and data sources. Security and arms control volume 2 is organized by sub-field. First, contending contemporary perspectives on the international system itself as the source of conflict and war are presented. The various facets of nuclear deterrence, including implications for the possible use of nuclear weapons, follow. The focus then shifts to conventional military power in the system, including arms transfers, the incidence of subconventional or low-intensity conflicts, including the practice of and possible responses to terrorism. The book concludes with strategic arms control, nuclear proliferation, and the study of crisis decision-making. Security and arms control volume 2 can be used as a text as well as serving as a valuable guide to the study of international and national security and arms control. Interested students and policy makers will find valuable material for their studies and research.

Will current strategic planning give the United States the sort of military capabilities that are needed to counter threats likely to occur in the future? Using first-hand experience at the Pentagon and an army background, Lieutenant Colonel Peters outlines serious problems, offers fresh insights into the defense planning process, and makes suggestions for developing an optimal force structure for the year 2000. This analysis utilizes case studies of the Gulf War, departing from recent studies about military reform. Policymakers, experts in political and military strategy, and political scientists interested in the inner workings of government agencies will find this study a provocative one. Peters assesses the global security environment in this post-cold war era and defines the risks and consequences likely to confront us, employing the

lens of organizational theory he points to disjunctures between military and political policies and dysfunctional practices in the defense department he describes the basic components in a force structure that would make the nation more secure militarily by the turn of the century
