a look at what world history might have been like if not for the fall of the western roman empire this is a fascinating exploration of how the

history of europe and indeed the world might have been different if the western roman empire had survived the crises that pulled it apart in the fourth and fifth centuries the author starts by showing how that survival and recovery might plausibly have happened if several relatively minor things had been different he then moves on to discuss a series of scenarios which might have altered the course of subsequent history dramatically would the survival of a strong western empire have assisted the eastern byzantine empire in halting the expansion of islam in the middle east and north africa how would the western roman empire have handled the viking threat could they even have exploited the viking discovery of america and established successful colonies there while necessarily speculative all the scenarios are discussed within the framework of a deep understanding of the major driving forces tensions and trends that shaped european history and help to shed light upon them in so doing they help us understand why things panned out as they did as well as what might have been

a brilliant authoritative narrative of the golden age of the anglo saxon kingdom in britain by an acclaimed historian of this period the eighth century has for too long been a neglected era in british history a shadow land between the death of saint bede and the triumphs of king *Ælfred* and the eventual unification of england but before the victories of king *Ælfred* against the viking invaders the kingdom of mercia spread across a broad swathe of central england was the reigning power that exercised central political authority for the first time since the roman empire this authority was used to construct trading networks and markets to develop strong economic cultural and political links with the continent and to lay the foundations for a system of defense that would be invigorated and reinvented by *Ælfred* at the end of the ninth century two kings *Æthelbald* 716 757 and *offa* 757 796 dominated the political landscape of the rising power of mercia during their reigns monasteries became powerhouses of royal patronage economic enterprise and trade *offa* constructed his grandiose dyke along the borders of the warlike welsh kingdoms and more subtly spread his message of political superiority through coinage bearing his image but *Æthelbald* and *offa* between them built something with an even more substantial legacy a geography of medieval england and these two kings engineered a set of tensions between kingship landholding and the church that were to play out dramatically at the dawn of the viking age in this illuminating history of early medieval britain max adams reconnects the worlds of the three kings *Æthelbald* *offa* and *Ælfred* in an absorbing study of the landscape society and politics of a fascinating century of change
