1. What are the main types of bank accounts?
Answer: The two primary types of bank accounts are:
 - **Checking Accounts:** Used for daily transactions such as deposits, withdrawals, writing checks, and using debit cards. They typically offer unlimited access and are designed for frequent use.

Answer: Overdraft fees occur when you spend more money than you have in your account. To avoid these fees: - Keep accurate records using your checkbook register. - Set up overdraft protection with your bank. - Monitor your account balance regularly via online banking. - Limit spending to available funds or only use linked accounts for overdraft protection. --- Understanding Digital Banking and Online Security As banking shifts toward digital platforms, understanding online banking security is essential to protect your finances. 1. A checking account is a bank account that allows you to deposit money, withdraw cash, and make payments via checks or debit cards. It provides a safe place to store funds and facilitates everyday transactions. Using a checking account responsibly—such as avoiding overdrafts—helps build financial discipline and creditworthiness. Q2: How does a savings account differ from a checking account? While checking accounts focus on daily transactions, savings accounts are designed for storing money over time, often earning interest. They usually have withdrawal limits to encourage savings and are ideal for building an emergency fund or saving for specific goals. Q3: What is a debit card, and how is it different from a credit card? A debit card deducts money directly from your checking account when used for purchases. It offers immediate access to funds and helps control spending. Conversely, a credit card borrows money from the credit

card issuer, allowing you to make purchases on credit, which you then pay back later. Responsible use of both is crucial to avoid debt. Q4: Why is budgeting important? Budgeting helps you plan your finances, ensuring you can cover expenses, save for future needs, and avoid overspending. It provides a clear picture of income versus expenditures and helps prioritize financial goals. Q5: How do interest rates work? Interest is the cost of borrowing money or the earnings from saving money. For savings accounts, interest is paid by the bank based on the account balance. For loans and credit cards, interest is charged on the amount borrowed, increasing the total repayment amount. Q6: What is a credit score, and why does it matter? A credit score is a numerical representation of your creditworthiness, based on your borrowing and repayment history. A higher score makes it easier to qualify for loans and get better interest rates. Maintaining good credit involves paying bills on time, keeping debt levels low, and avoiding defaults.
