the encyclopedia of production and manufacturing management is an encyclopedia that has been developed to serve this field as the fundamental reference work over the past twenty years the field of production and operations management has grown more rapidly than ever and consequently its boundaries have been stretched in all directions for example in the last two decades production and manufacturing management absorbed in rapid succession several new production management concepts manufacturing strategy focused factory just in time manufacturing concurrent engineering total quality management supply chain management flexible manufacturing systems lean production and mass customization to name a few this explosive growth makes the need for this volume abundantly clear the manufacturing industry thinks and acts more broadly than it did several decades ago

the most notable change has been the need for manufacturing managers to think in technological strategic and competitive terms this is a very favorable development and it leads to manufacturing success the entries in this encyclopedia include the most recent technical and strategic innovations in production and manufacturing management the encyclopedia consists of articles of varying lengths the longer articles on important concepts and practices range from five to fifteen pages there are about 100 such articles written by nearly 100 authors from around the world in addition there are over 1000 shorter entries on concepts practices and principles the range of topics and depth of coverage is intended to suit both student and professional audiences the shorter entries provide digests of unfamiliar and complicated subjects difficult subjects are made intelligible to the reader without oversimplification the strategic and technological perspectives on various topics give this encyclopedia its distinctiveness and uniqueness the world of manufacturing today is increasingly competitive it is apparent that manufacturers must respond to these competitive pressures with technical and strategic innovation this encyclopedia has been developed to help researchers students and those in the manufacturing industry to understand and implement these ongoing changes in the field

whether you re studying for the apics certification examination or looking for ways to improve your existing manufacturing process manufacturing planning and control systems fourth edition is the resource to turn to

vollman berry whybark and jacobs manufacturing planning control systems 5 e provides comprehensive real world based coverage of the concepts tools and methods used to manage and control manufacturing systems this major revision contains four entirely new chapters and four thoroughly upgraded to nearly original content erp system coverage and the impact of them in the field is covered now in a new introductory chapter 4 as well as being integrated heavily into many other chapters from sales and operations planning 3 to advanced scheduling systems 16
