johannes kepler contributed importantly to every field he addressed he changed the face of astronomy by abandoning principles that had been in place for two millennia made important discoveries in optics and mathematics and was an uncommonly good philosopher generally however kepler s philosophical ideas have been dismissed as irrelevant and even detrimental to his legacy of scientific accomplishment here rhonda martens offers the first extended study of kepler s philosophical views and shows how those views helped him construct and justify the new astronomy martens notes that since kepler became a copernican before any empirical evidence supported copernicus over the entrenched ptolemaic system his initial reasons for preferring copernicanism

were not telescope observations but rather methodological and metaphysical commitments further she shows that kepler s metaphysics supported the strikingly modern view of astronomical method that led him to discover the three laws of planetary motion and to wed physics and astronomy a key development in the scientific revolution by tracing the evolution of kepler s thought in his astronomical metaphysical and epistemological works martens explores the complex interplay between changes in his philosophical views and the status of his astronomical discoveries she shows how kepler s philosophy paved the way for the discovery of elliptical orbits and provided a defense of physical astronomy s methodological soundness in doing so martens demonstrates how an empirical discipline was inspired and profoundly shaped by philosophical assumptions

a critical volume for the homeschooling community that helps parents make informed choices regarding learning styles and curriculum

if you re a parent who has decided to educate your children yourself this book is the first you should buy washington times the well trained mind will instruct you step by step on how to give your child an academically rigorous comprehensive education from preschool through high school one that will train him or her to read to think to understand to be well rounded and curious about learning veteran home educators jessie wise and susan wise bauer outline the classical pattern of education called the trivium which organizes learning around the maturing capacity of the child s mind and comprises three stages the elementary school grammar stage the middle school logic stage and the high school rhetoric stage using this theory as your model you ll be able to instruct your child in all levels of reading writing history geography mathematics science foreign languages rhetoric logic art and music regardless of your own aptitude in those subjects this newly revised edition contains completely updated ordering information for all curricula and books new and expanded curricula recommendations new material on using computers and distance learning resources answers to common questions about home education information about educational support groups and advice on practical matters such as working with your local school board preparing a high school transcript and applying to colleges
