nothing sets off a car quite like window tint from making it look better to cooling it off there are numerous reasons why tinting your windows is often times a no brainer however window tinting has long been viewed as one of those things you can't do yourself and still expect great results luckily the four basic steps in window tinting your car destroys that way of thinking and shows readers everywhere how to tint windows themselves filled with priceless tips and step by step instructions this remarkable guide will easily have beginners tinting their own windows in no time designed to help readers get comfortable with the process this educational guide condenses the lessons learned in a long tinting career into this one stop shop of window tinting information written in a lighthearted and easy to read style the four basic steps in window tinting your car is easily understood by even the most inexperienced of beginners taking the mystery out of window tinting this educational guide teaches readers everything from the different types of tint to what tool is better for each job packed with easy to understand steps and helpful illustrations this amazing resource is extraordinarily useful for beginners getting comfortable with window tinting

the 1993 session of the virginia general assembly lessened restrictions relating to the application of aftermarket tinted window films to motor vehicle glass effective july 1 1993 vehicles are allowed to have window tinting treatments that do not reduce the transmittance of light below 35 for rear and rear side windows and 50 for front side windows but no aftermarket tinting may be applied to windshields however the new legislation allows lower transmittance levels for the windows on vehicles used by individuals with a medical waiver the traffic safety community is concerned that aftermarket window tint film may increase the incidence of traffic crashes by limiting a driver's ability to see out of a vehicle and it may compromise the safety of police officers by limiting an officer's ability to see into a vehicle that he or she has stopped the window tinting industry however notes the lack of empirical evidence correlating window tinting and traffic crashes or police officer injuries or fatalities the concerns of industry and the traffic safety community were balanced by the adoption of senate joint resolution 293 which directed the virginia departments of motor vehicles and state police to study the issue the study found that window tinting reduces the ability to detect targets that would be difficult to see through clear glass and this can be a liability when ambient lighting is low in addition the adverse effects of window tinting become increasingly pronounced as transmittance goes below 70 particularly

for people who wear spectacles and for older drivers there is no evidence however that reduced visibility significantly affects drivers performance during well illuminated daytime hours the difficulties are more likely to be manifested at night further by reducing the amount of light transmittance window tinting reduces the ability of an outside observer to see into a vehicle which has led to the concerns about the safety of police officers although there are only limited optical benefits to be derived from window tinting and there are a number of potential optical detriments there is no empirical evidence to indicate that the tinting allowed under virginia s current laws creates a safety hazard in terms of driver performance thus it is recommended that virginia s new laws on window tinting not be changed unless compelling evidence that the standards compromise safety is found in the future however further research is recommended it is also recommended that federal regulations and or action by the states to achieve national uniformity be encouraged in order to promote uniformity in laws and regulations concerning aftermarket window tinting
