un ouvrage ici dans sa version epub pour décortiquer une nouvelle manière d enseigner à distance et distinguer ce qui relève du mythe et ce qui est fondé scientifiquement l enseignement à distance s est considérablement développé ces dernières années il a bénéficié du progrès des outils et de la qualité des réseaux mais surtout de la période covid et de la fermeture des établissements d enseignement écoles collèges lycées et universités souvent sans préparation ni formation spécifique les enseignants ont dû innover pour mettre en place la continuité éducative cherchant des solutions immédiates pour transférer un contenu pédagogique prévu en présentiel l occasion a été en partie manquée elle le sera tout autant tant que le rôle des différents acteurs et que les finalités du distanciel ne seront pas mieux définis car certains mythes ont la vie dure y compris parmi les communautés pédagogiques À travers dix chapitres cet ouvrage s attache à déconstruire ces mythes tels que la situation de la crise sanitaire a donné la possibilité de faire réellement de l enseignement à distance le e learning c est de l apprentissage à distance enseigner et apprendre à distance sont des activités solitaires un cours à distance est un cours en présentiel mis en ligne en formation à distance l enseignant perd la propriété de ses cours la formation à distance est avant tout une question de maitrise des technologies une réflexion indispensable pour tous les pédagogues du 21e siècle
