telling an american horror story collects essays from new and established critics looking at the many ways the horror anthology series intersects with and comments on contemporary american social political and popular culture divided into three sections the chapters apply a cultural criticism framework to examine how the first eight seasons of ahs engage with american history our contemporary ideologies and social policies part i explores the historical context and the uniquely american folklore that ahs evokes from the southern gothic themes of coven to connections between apocalypseand anxieties of modern american youth part ii contains interpretations of place and setting that mark the various seasons of the anthology finally part iii examines how the series confronts notions of individual and social identity like the portrayals of destructive leadership in cult and lesbian representation in asylum and hotel

paul has provided a vital piece to our understanding of modern liberalism s origins ronald j pestritto author of america transformed the rise and legacy of american progressivism today s political and cultural divisions leave many wondering how america could have arrived at its present state this book traces the source to an unlikely historical accident the founding principles of the american revolution that all individuals have unalienable natural rights to life liberty and the fruits of their labor and that governments should exist only to protect these rights were a singularity in human history the nation s failure to secure the slaves equal rights to self ownership led to a civil war and the constitutional recognition of this vital principle and yet scarcely four decades later social science faculties at the country s top colleges and universities repudiated the country s founding principles the cause of this startling change was the education that hundreds of american college students and graduates received in german universities in the late 19th century

germany's professoriate was dominated by state socialists who taught that individuals had no natural rights only privileges granted to them by the government american students absorbed these beliefs and after their return established this country's first graduate level programs seeding the first generation of phds inventing the name progressives for themselves their goal was to recast america's governmental and economic institutions in the image of germany's authoritarian government and oligarchical society higher education was transformed with disastrous results for the humanities and social sciences generation after generation of students including those who went on to teach abandoned this country's traditional relationship of the individual to the state over the next several decades american politics journalism law and education evolved in directions inimical to the nation's founding principles leaving the country increasingly fractured not unlike the decades leading up to the first civil war this book traces those changes offering ways to alter the trajectory of today's political and educational culture it includes a proposal to eliminate personal and corporate income and payroll taxes and raise today's government revenues with a low 1 universal sales tax

this edited collection assesses the complex historical and contemporary relationships between us and australian cinema by tapping directly into discussions of national cinema transnationalism and global hollywood while most equivalent studies aim to define national cinema as independent from or in competition with hollywood this collection explores a more porous set of relationships through the varied production distribution and exhibition associations between australia and the us to explore this idea the book investigates the influence that australia has had on us cinema through the exportation of its stars directors and other production personnel to hollywood while also charting the sustained influence of us cinema on australia over the last hundred years it takes two key points in time the 1920s and 1930s and the last twenty years to explore how particular patterns of localism nationalism colonialism transnationalism and globalisation have shaped its course over the last century the contributors re-examine the concept and definition of australian cinema in regard to a range of local international and global practices and trends that blur neat categorisations of national cinema although this concentration on us production or influence is particularly acute in relation to developments such as the opening of international film studios in melbourne sydney adelaide and the gold coast over the last thirty years the book also examines a range of hollywood financed and or conceived films shot in australia since the 1920s

nearly a decade ago a general review article on the evaluation of optical radiation hazards was published in applied optics slinney and freasier 1973 this article received many favorable comments but also prompted many inquiries regarding specific optical hazard problems from this it became evident that a monograph rather than a supplemental and expanded article was needed to fill this literature gap relating to laser and optical radiation hazards the present work is designed to fill that gap and is structured to permit either classroom or self study use much of the material in this book was developed in connection with short courses on laser safety and radiometry in which we have participated as well as from our previous articles in particular the sequence of chapters is based upon the experiences which we have had in lecturing in courses with different schedules one of the great difficulties in developing a text of this nature is that a broad multidisciplinary background must be included in order that the reader can comprehend all of the subject matter readily for this reason the material presented on anatomy and physiology is oriented toward the engineer or physical scientist while the review material on basic optical physics is intended more for the physician or life scientist
