a brief introductory astronomy book designed for readers with little or no scientific background a beginner s guideuses an exceptionally clear writing style the authors present a broad view of astronomy without complex mathematics yet the book discusses important concepts without simplification the book s organization follows the popular and effective earth out progression starting with our planet and then moving through the solar system a study of the sun as a model star follows then the book covers the milky way galaxy cosmology and the universe as a whole because of its easy to read yet comprehensive coverage of astronomy this book can serve as excellent reference material for those readers interested in learning about our universe personal response system through a partnership with interwrite prs this text is available with the prs clicker system the instructor resource center on cd rom contains conceptual clicker questions in powerpoint

today s academic environment presents assessment challenges defined by an increased volume of available information coupled with increased competition among students and time constraints multiple choice

questions mcqs provide examiners with an opportunity to assess academic performance on the basis of instant recollection of correct answers in a minimal amount of time mcqs series for life sciences volume 1 is a collection of mcqs on advanced topics and offers the following benefits for readers includes over 2600 relevant mcqs covers five advanced subjects including biochemistry cell biology developmental biology genetics molecular biology and immunology simplified language and presentation of concepts answers to each question are provided this mcqs ebook series in life sciences is therefore a handy reference for graduate and postgraduate students undertaking examinations or entrance tests as well as teachers or examiners involved in setting and controlling assessments in specific subjects in life sciences
