Islam encourages business and financial transactions as a way of securing the basic needs for all human beings but these need to be conducted in accordance with the principles contained in the Qur'an and Sunnah. However, these legal concepts are not classified subject wise and the verses on commercial law like all other topics are scattered throughout the Qur'an making it difficult for readers to gain a full understanding of the topic. This therefore is the first comprehensive book to demystify Islamic contract law and specifically Islamic financial contracts and to examine its roots and history. The book is written in a clear style to allow for a greater understanding of the more challenging and misunderstood areas pertaining to Islamic business and financial contracts. It also contributes a series of chapters which address the market niche and need concerning Shariah compliance for Islamic financial products and services. The book is divided into 16 chapters in order to provide a holistic and thorough overview of Islamic law of contract. It covers the objections and misconceptions surrounding Islamic business and financial contracts. It also includes the key features and guiding principles of Islamic law of contract and offers technical know-how illustrating the concept of formation of a contract as well as the essential elements of a valid contract. The authors also offer a discussion on the system of options under Islamic business and financial contracts and potential solutions to breach of contracts. The book will serve as a handy reference for scholars and students of Islamic business and finance and Islamic commercial law and will also be beneficial for practitioners as well as legal and judicial officers. It will open new doors for further research in the field of Islamic financial contracts.

Magic, mystery and science presents the occult as a third stream of belief as important to the shaping of Western civilization as Greek rationalism or Judeo-Christianity. The occult seeks explanations in a world that is living and intelligent quite unlike the one supposed by science. By taking these beliefs seriously while keeping an eye on science, this book aims to capture some of the power of the occult. Readers will discover that the occult has a long history that reaches back to Babylonia and ancient Egypt. It proceeds alongside and frequently mingles with religion and science from the Egyptian book of the dead to New Age beliefs from Plato to Adolf Hitler. Occult ways of knowing have been used to explain a world that still tempts us with the knowledge of its dark secrets. From publisher's description.

This book examines the evolution of Muslim community development in Newark, New Jersey. It is an historical account of the efforts of a diverse community that over several decades grappled with the challenge of establishing a respected place for their Islamic lifestyle within the United States. Further, it is a story linked closely to the experience of African Americans who have claimed Islam as their religion and struggled to create and to maintain an identity in the social fabric of Newark's twentieth-century Black religious culture. The complexities of race identity inter

religious and intra religious relations are the four central themes explored

the struggle to attain inner peace has been with humankind since the earliest times but what does it mean and is it even attainable are people being deprived of inner peace because of obstacles in the path both real or perceived how does a materialistic outlook affect one's search for inner peace most importantly what is the only guaranteed way to achieve true and lasting inner peace in this book jamaican born scholar dr bilal philips examines the topic in detail and provides concrete and satisfying answers
