this book highlights how resource constraints and client agency impact china's patronage policy in their pursuit of regional geopolitical power by combining for the first time the limit of great power patrons resources and the agency of client countries this book accentuates that the costs and uncertainty require china to be a wary patron who must adjust its patronage priorities in order to deal with geopolitical competition using china's patronage delivery to north vietnam during the fierce and geopolitically competitive period of the vietnam war the book underscores that neighboring countries domestic political dynamics which are out of beijing's control drive costs and uncertainty thus constraining beijing's choices with a wealth of historical materials including minutes of chinese decision makers conversations with foreign counterparts selections of chinese leaders manuscripts chronologies of their diplomatic economic and military activities senior chinese officials memoirs and biographies and declassified chinese official documents this book will be of interest to students and scholars of chinese politics history and international relations

jonathan ping's volume establishes a unifying theory for the concept of middle power mp mps are states which have an innate form of statecraft and perceived power as a result of their size the book presents hybridization theory as a basis for analysis policy development and prediction of mp statecraft and perceived power a prerequisite to the founding of hybridization theory is the new statistical method of definition which identifies sixteen mps of asia and the pacific the volume takes a comparative focus on indonesia and malaysia to inform and test hybridization theory as well as to provide a historical analysis of southeast asia from a statecraft and perceived power perspective it offers researchers and scholars of international relations and international political economy a theory that can be applied to the practical study of all middle sized states while middle sized states can apply the same theory to enhance their own ability to re create their state

this book introduces the editors new concept of awkward powers by undertaking a critical re examination of the state of international relations theorising on the changing nature of the global power hierarchy it draws attention to a number of countries that fit awkwardly

into existing but outdated categories such as great power and middle power it argues that conceptual categories pertaining to the apex of the international hierarchy have become increasingly unsatisfactory and that new approaches focusing on such awkward powers can both rectify shortcomings on power theorising whilst shining a much needed theoretical spotlight on significant but understudied states the book's contributors examine a broad range of empirical case studies including both established and rising powers across a global scale to illustrate our conceptual claims through such a novel process we argue that a better appreciation of the de facto international power hierarchy in the 21st century can be achieved

machiavelli's observation on leaders' challenge to balance power is just as relevant in our time with renewed military, economic and cultural conflicts as it was in 16th century Florence. China's growth, Russia's attack on Ukraine and the increasing political and economic salience of the Global South have made the importance of competent leadership in political governance an ever more relevant issue. This anthology examines the challenges for leadership and statecraft in a progressively complex world and considers the question of how we can create political elites that are capable of safely guiding the West through the many challenges we face by ensuring that both our past and present are taken into consideration. World-leading researchers and writers investigate how ideas of leadership have developed through history to give us a greater understanding of statecraft and of what skills and organisations are needed to run small states, large empires and everything in between.

The increasing capacity of states to muster violence, the concomitant rise of military power as a meaningful instrument of foreign policy and the frequent episodic collapse of that power are considered in this examination of force, order and diplomacy. Nathan points to periods of relative order and stability in international relations: the time immediately prior to the rise of Frederick the Great, for example, or the half-century after the Napoleonic Wars as times when states have been most vulnerable to spoilers and rogues. Only the power of the Cold War blocs fostered durable order. Now, notwithstanding novel elements of globalization, international relations appear as dependent as ever on the prudent management of force. Students, scholars and soldiers are frequently exposed to Clausewitz, Westphalia, Napoleon, World War I and the like, but what makes these events and individuals so important? This book is Clausewitz's successor, insisting that soldiers and statesmen know and master the integrative potential of force. Nathan provides a narrative account of the people and events that have shaped international relations since the onset of the state system. He asserts that an understanding of the limits and utility of persuasion as well as the corresponding limits and utility of force will help assure national security in a world filled with more uncertainties than ever in the last 50 years.

The People's Republic of China is the world's most populous state and largest consumer of energy, having demonstrated momentous

progress on an unprecedented scale this global power has increasingly shaped international relations as a result of its population size economic development and political character identifying the most significant new issues and problems that have arisen from china s rapid development this book examines the evolution of china s contemporary foreign policy and international relations in doing so it underlines the global importance of china s management of its own politics and economics and demonstrates how all nation states have a vested interest in and to varying degrees are liable for the consequences of chinese actions the book aims to spark debate by drawing attention to these critical issues placing them on the scholarly agenda as well as that of the practitioner it provides factual evidence progressive findings justification and a rationale for action expert analysis and the resulting policy prescriptions in addition the book highlights the liable costs of failing to address china s strategic priorities this interdisciplinary book draws attention to the most pressing issues that china must address for universal benefit and will be of great interest to students and scholars of international relations chinese studies and political science
