you will never look at the world in the same way after reading as the future catches you
juan enriquez puts you face to face with a series of unprecedented political ethical
economic and financial issues dramatically demonstrating the cascading impact of the
genetic digital and knowledge revolutions on your life genetics will be the dominant
language of this century those who can speak it will acquire direct and deliberate control
over all forms of life but most countries and individuals remain illiterate in what is rapidly
becoming the greatest single driver of the global economy wealth will be more
concentrated and those with knowledge to sell both countries and individuals will be the
winners consider what will happen when your genetic code can be digitally imprinted on
an id card and your insurance company and employer see that you are genetically
disposed to say heart disease pharmaceutical products are developed so that you can
eat genetically modified broccoli to protect yourself from cancer cloning will be as
common as in vitro fertilization and scientists can influence the genetic design not only of
other species but of your own children creating wealth no longer requires many hands
lone individuals are giving birth to entire new industries that rapidly become bigger than
the economies of most countries on earth but create very few jobs as the future catches
you resembles no other book a typical page may contain just a few dozen words but

each seemingly discrete fact is like a chip in an intellectual mosaic that reveals its meaning and beauty only as you step back and see the big picture

Juan Enriquez is like the best teacher you ever had one who helps you to see something in a new light and makes you say now I get it

Juan Enriquez's main point is that technology is not kind it does not say please but slams into existing systems and destroys them while creating new ones

Countries and individuals can either surf new and powerful waves of change or get crushed trying to stop them

The future is catching us all let it catch you with your eyes wide open

Walk don't run whatever was going to happen Aidan Kendall had decided to stay and ride it out

The truth was he was tired of running tired of packing up his suitcase and hitting the road to nowhere tired of being alone keeping people at arm's length and waiting for the shadow following on his heels to catch up with him and destroy him

Maybe that was the reason he'd stayed in Old Orchard perhaps subconsciously he'd known that this was where his running would end so he would stop running and that included from the mysterious and unique Penelope Moon and whatever bonds were developing between them but would their love be strong enough to survive the truth

Breakthroughs in biotechnology are redefining the very concept of life transforming society and presenting unprecedented opportunities and challenges

Will human genome sequencing help to treat genetic diseases and indefinitely prolong life

Can nature's workshops inspire superior biomaterials that transform industries

Will genetically modified super crops feed a hungry world

With biotechnology set to be the driving force of the twenty-first century mastery of the life sciences will be the key to wealth generation and economic ascendancy

Can the Arab world regain its past supremacy in these fields

Can it benefit from the biotech revolution while avoiding its perils

These essays examine the complex ethical legal and social issues raised by the biotech revolution that need to be

resolved by governments and decision makers

when death gives workaholic maddy banks a second chance at happiness she realizes schmoozing her way through life isn't much of a life at all original
