code main proc  
mov ah 09h Print string function  
code lea dx msg Load the address of the message

mov ah 4ch Exit program function  
code int 21h Call the DOS interrupt  
main endp  
end main

**Explanation** data This section defines the message string Hello world and a newline character 0Ah to be used in the program code. This section contains the actual program code main proc. This line defines the entry point of the program. mov ah 09h This instruction sets the ah register to 09h which is the function code for printing a string. lea dx msg This instruction loads the address of the message string msg into the dx register. int 21h This instruction calls the DOS interrupt 21h which executes the specified function code stored in ah. mov ah 4ch This instruction sets the ah register to 4ch which is the function code for exiting the program. int 21h This instruction again calls the DOS interrupt 21h executing the exit program function code 3. main endp This line marks the end of the main procedure. end main This line signals the end of the program.
