a study to correlate stress wave emission characteristics with fracture in welded and unwelded aluminum alloys tested at room and cryogenic temperature is reported the stress wave emission characteristics investigated were those which serve to presage crack instability viz a marked increase in 1 signal amplitude 2 signal repetition rate and 3 the slope of cumulative count plotted versus load the alloys were 7075 t73 2219 t87 and 2014 t651 welded with mig and tig using 2319 and 4043 filler wire the testing was

done with both unnotched and part through crack ptc tension specimens and with 18 in dia subscale pressure vessels in the latter testing a real time acoustic emission triangulation system was used to locate the source of each stress wave emission with such a system multiple emissions from a given location were correlated with defects found by conventional nondestructive inspection

the world renowned experts at jama explain statistical analysis and the methods used in medical research written in the language and style appropriate for clinicians and researchers this new jama guide to statistics and methods provides explanations and expert discussion of the statistical analytic approaches and methods used in the medical research reported in articles appearing in jama and the jama network journals this addition to the jamaevidence series is particularly timely and necessary because today s physicians and other health care professionals must pursue lifelong learning to keep up with the ever expanding universe of new medical science and evidence based clinical information readers and users of research articles must have a firm grasp of the myriad new statistical analytic and methodologic approaches used in contemporary medical studies to provide concrete examples the explanations in the book link to research articles that incorporate the specific statistical test or methodological approach being discussed
