this document provides a critical review of different frameworks for uncertainty analysis in a risk analysis context classical probabilistic analysis imprecise probability interval analysis probability bound analysis evidence theory and possibility theory the driver of the critical analysis is the decision making process and the need to feed it with representative information derived from

the risk assessment to robustly support the decision technical details of the different frameworks are exposed only to the extent necessary to analyze and judge how these contribute to the communication of risk and the representation of the associated uncertainties to decision makers in the typical settings of high consequence risk analysis of complex systems with limited knowledge on their behaviour

this document is an introduction for non economists to standard and behavioral economic theories of risk and uncertainty it describes some broadly accepted results in economics that are determinant in decision making under risk or uncertainty and in situations where we have to deal with losses and gains to illustrate this point the document presents a selection of theoretical results punctuated with examples taken from everyday life and research studies in economics and psychology on the perception of risk

the authors introduce the general concepts definitions and issues related to the use of risk informed decision making risk these are structured processes which assist decision makers when faced with high impact complex decisions involving multiple objectives and the presence of uncertainty they aim to ensure that decisions between competing alternatives are taken with an awareness of the risks associated with each option and that all attributes of a decision are considered in an integrated manner motivations for the use of these techniques as a complement to more traditional deterministic approaches to risk assessment are provided the risk processes adopted by nasa and by the us nuclear regulatory commission are described in detail with an analysis of commonalities and differences in approach
