war related separations challenge military families in many ways the worry and uncertainty associated with absent family members exacerbates the challenges of personal social and economic resources on the home front u s military operations in iraq and afghanistan have sent a million service personnel from the u s alone into conflict areas leaving millions of spouses children and others in stressful circumstances this is not a new situation for military families but it has taken a toll of magnified proportions in recent times in addition medical advances have prolonged the life of those who might

have died of injuries as a result more families are caring for those who have experienced amputation traumatic brain injury and profound psychological wounds the department of defence has launched unprecedented efforts to support service members and families before during and after deployment in all locations of the country as well as in remote locations stress in u s military families brings together an interdisciplinary group of experts from the military to the medical to examine the issues of this critical problem its goal is to review the factors that contribute to stress in military families and to point toward strategies and policies that can help covering the major topics of parenting marital functioning and the stress of medical care and including a special chapter on single service members it serves as a comprehensive guide for those who will intervene in these problems and for those undertaking their research

this project contains three major parts in the first part a digital computer simulation model was developed with the aim to model the traffic through a freeway work zone situation the model was based on the arena simulation software and used cumulative interarrival times as the input its aim was to determine the traffic volumes through the work zone and the queue lengths in advance of lane restrictions the program was designed to handle up to 15 miles in length up to six lanes and up to 20 entrance and exit ramps the developed program has not been validated due to the lack of reliable field data and the program appears to produce unreasonably short queue lengths and low exit ramp traffic counts compared to the input traffic data for cases where the exit ramps are spaced closely together in the second part a diversion analysis was performed to determine the effects of closed ramps the work zone sites were assigned by ohio department of transportation and the diversion effects for these situations were in one case very minimal and in the other case as expected traffic shifted to the next open exit ramp in the third part guidelines for ramp management and ramp metering were established on a 24 7 basis giving special considerations to freeway mainline throughput and local traffic access to freeway

this 2008 edition of the oecd information technology outlook analyses recent developments in the it goods and services industries and suggests that the outlook is for constrained but continued long term growth
