the book of revelation offers us an interesting theological dilemma it states rev 22 16 i jesus have sent mine angel to testify unto you these

things in the churches revelation also states it is the true sayings of jesus and that it is the testimony of christ if this is not the gospel of jesus christ then what is it and should we consider it accursed testimony of an angel if it is not to be considered accursed then it cannot be some other gospel message then what was already given previously however this is the conundrum for if this is the gospel message then why do so few understand it there is a possibility which few consider but is the overall thesis of this apology the reason people don't understand revelation is because they never understood what the gospel message was in the first place in that case where does that put those who claim it is not essential for salvation do you not find it quite curious that the most personally given nt book by jesus himself is the least understood and given the least importance for salvation in christendom there are numerous preachers and bible exegetes but as paul said i bear them record that they have a zeal of god but not according to knowledge most who profess the name of christ are feeding on doctrines of devils and the ignorant there are without question many qualified teachers and scholars with many years of dedication and solid education however teachers no matter how well lettered or numbered in degrees if obtained from others who are just as equally ignorant in such matters are just blind leaders of the blind and if the blind lead the blind both shall fall into the ditch

the worsening environmental crisis has become a serious threat to mankind the search for a solution to this crisis must begin by understanding its causes taking an eco socialist perspective the ecological crisis and the logic of capital explores the logic of capitalism as a fundamental cause of today's environmental crisis in particular the thirst for profit and the capitalist mode of production by demonstrating the inherent antagonism between capital and ecology this book argues that proposals to resolve the crisis within the capitalist system are utopian that proposed remedies relying on scientific progress alternative energies low carbon technologies or the introduction of ecological ethics and new attitudes toward nature into market mechanisms are doomed to failure without a radical overhaul of the principles that govern capitalism
