since the third edition of Grieve's Modern Manual Therapy was published in 2005 the original concepts of manipulative therapy have grown to embrace new research generated knowledge expansions in practice have adopted new evidence which include consideration of psychological or social moderators the original manual therapy or manipulative therapy approaches have transformed into musculoskeletal physiotherapy and this is recognized by the change in title for the new edition Grieve's Modern Musculoskeletal Physiotherapy Grieve's Modern Musculoskeletal Physiotherapy continues to bring together the latest state of the art research from both clinical practice and the related basic sciences which is most relevant to practitioners the topics addressed and the contributing authors reflect the best and most clinically relevant contemporary work within the field of musculoskeletal physiotherapy with this as its foundation and a new six strong editorial team at its helm the fourth edition now expands its focus from the vertebral column to the entire musculoskeletal system for the first time both the spine and extremities are covered capturing the key advances in science and practices relevant to musculoskeletal physiotherapy the book is divided into five parts containing multiple sections and chapters the first part looks at

advances in the sciences underpinning musculoskeletal physiotherapy practice here there is commentary on topics such as movement the interaction between pain and motor control as well as neuromuscular adaptations to exercise applied anatomical structure is covered in addition to the challenges of lifestyle and ageing a new section highlights the important area of measurement and presents the scope of current and emerging measurements for investigating central and peripheral aspects relating to pain function and morphological change another section discusses some contemporary research approaches such as quantitative and qualitative methods as well as translational research part iii contains sections on the principles of and broader aspects of management which are applicable to musculoskeletal disorders of both the spine and periphery topics include models for management prescription communication and pain management and contemporary principles of management for the articular nervous and sensorimotor systems in recognition of the patient centred and inclusive nature of contemporary musculoskeletal practice there is also discussion about how physiotherapists may use cognitive behavioural therapies when treating people with chronic musculoskeletal disorders the final part of the book focuses on selected contemporary issues in clinical practice for a particular region condition or the most topical approaches to the diagnosis and management of a region a critical review of the evidence or developing evidence for approaches is given and areas for future work are highlighted presents state of the art manual therapy research from the last 10 years multidisciplinary authorship presents the viewpoints of different professions crucial to the ongoing back pain management debate highly illustrated and fully referenced

this book presents multiple aspects of spine care from the perspective of different disciplines it s organized by sections focused on non operative care spine injections and procedures perioperative care operative care pediatric care and special topics each chapter has been written by a clinician whose active practice involves the topic of their chapter practical and clinically relevant this book educates any practitioner who cares for patients with back and neck pain and other spine conditions about implementing a multidisciplinary team to treat the spine

this book provides an overview of pain mechanisms as currently understood and details a variety of approaches to pain management used across a wide range of complementary disciplines a final chapter integrates these body based and mind body approaches and helps the clinician offer the most effective care for the patient the first part of the book discusses pain symptoms and the ways in which pain is experienced by individual patients this section deals with the anatomy and pathology of pain and describes present views of what causes pain to occur and persist integrative care concepts are presented emphasizing multi disciplinary approaches to addressing pain in the second part expert contributors describe therapeutic approaches to addressing pain conditions and implementing self care management options specific to the various disciplines when available research supporting the evidence for these interventions is incorporated in the last chapter the editors model various care pathways based on these approaches to assist healthcare practitioners in deciding how to effectively co manage pain including guidance on when and where to refer

new revised content throughout the book provides the most current information for effective practice and includes updated references as well as a discussion of pain

mechanisms new screening for neurologic conditions chapter focuses on conditions that require immediate referral when the neurologic condition is in the prodromal stage and have not yet been diagnosed by a medical professional new updated screening tools include optimal screening for prediction of referral and outcome yellow flag ospro yf and optimal screening for prediction of referral and outcome review of systems ospro ros new enhanced ebook version is included with every print purchase allowing access to all of the text images and references from the book on a variety of devices new updated appendices include screening tools and checklists available in the ebook

back pain has always been common but there has been a change in thinking about back care a lot has been learned about backache and most people can and do deal with back pain themselves most of the time this booklet gives advice on how to deal with backache avoid disability and recover quickly

sooner or later almost everyone suffers an episode of back pain usually it is an unpleasant awkward but not desperately serious problem occasionally there may be a more serious underlying cause back pain is a major and increasing health problem and is now the principal cause of absence from work this booklet aims to show you how the back works what goes wrong why back problems arise how they are treated and to give some indication of when further investigations and specialised help are necessary

back pain is essentially a lifestyle disorder getting better often means overcoming mental blocks the only worthwhile aim is to be fully mobile totally active and completely free of back pain this is a realistic goal and if we care passionately about the final result this book tells us how to achieve it there are over a hundred different causes for back pain some well known while others less so this book explains the genesis of various problems and how to prevent them more important it describes treatments and remedies for a lifetime of relief from back ache and sciatica without in majority of cases surgery or prolonged hospital treatment written especially for the victims of this excruciatingly painful condition this is perhaps the most sensible informative and positive book on the subject

unknown to most are the many studies reporting that most low back pain is a rapidly reversible condition that is it can be eliminated often quickly by the patients themselves this large subgroup can now be identified early on providing opportunity for great cost savings and a goldmine of research discoveries about the causes of and solutions to low back pain dr donelson is a veteran spine specialist researcher and educator who brings badly needed common sense and evidence to this complex problem of low back pain in this hard to put down account he accurately exposes flaws in the low back pain scientific process and then offers simple logical remedies his insightful review of this valuable yet ironically overlooked clinical research reveals both clinical and economic solutions from implementing patient specific treatments rather than the one size fits all guideline recommendations this refreshing approach offers clinicians clinical methods to objectively determine non pharmacologic ways for patients to gain control of their own low back pain and to recover more quickly and simply such objective decision making offers new insights into how to avoid the need for medication expensive imaging or specialist referral including low back surgery and for the first time psychosocial factors and manual therapies are placed in their proper perspective this is a valuable read for any stakeholder seeking to improve the management of low back pain and to dramatically reduce its annual u s cost of 50 billion or more employers payers and disease management groups alike will benefit from these reliable means of determining the few necessary and many avoidable costs of managing low back pain
