the french riviera a history ranges from the terra amata in nice occupied from

380 000 years ago and one of the oldest inhabited prehistoric sites in the world through to settlement by greeks romans franks ostrogoths and visigoths wars and revolutions to the establishment of the silicon valley of france in sophia antipolis in 1974 michael nelson shows the surprisingly cosmopolitan nature of the area in the early middle ages such as the story of the finishing school run by frankish kings in the 7th century where siagrius the ruler of the region had studied and where the son of king edwin of northumbria in england was also sent the riviera was part of provence in france for much of its history and was often a microcosm of france itself with many dynastic struggles and horrific blood letting colour maps and plates illustrate the french riviera a history and it is also full of fascinating anecdotes examples include the loan of a guillotine by nice to grasse in the french revolution nice had no victims and grasse had thirty and the occasion when jean moulin the leader of the french resistance in world war ii invited the germans to the opening of an art gallery in nice which he was using as a front in the nineteenth and twentieth century the british and americans led tourism and the riviera was described by somerset maugham as a sunny place for shady people the french riviera a history is a fascinating look back over the riviera s rich history perfect to dip into or follow the whole historical journey in one sitting it will make the perfect addition to any history buff s bookcase

provides a wealth of practical information on planning your visit shopping dining out accommodation and seasonal events recommended sights and excursions for exploring destinations near and far all graded to michelin s renowned star system maps and town plans from michelin s respected cartographers touring plans and itineraries to help make the most of your holiday

taxonomy provides the basic building blocks of our understanding of the diversity of life on this planet it stems from innate human curiosity confronted with an unknown species or object we ask what is it taxonomists recognize species and other systematic unities the taxa define them and place them within the framework of known organisms providing the means for their subsequent identification the catalogue of palaearctic coleoptera edited by i d löbl gives a taxonomic overview of the most diverse group of all living things in the world s largest biogeographical area it fixes nomenclature needed for unambiguous transfer of information gives information about the occurrence

of species and subspecies and contains references that provide key information of over 40 000 systematic units the work is a scaffold for biotic surveys ecological studies and nature conservation it responds also to the urgent need of assessment of the still left forms of life actually threatened by the on going destruction of habitats contributors are robert b angus martin fíkáček elio gentili manfred a jäch fenglong jia tomáš lackner ivan löbl sławomir mazur yusuke minoshima alfred f newton michel perreau alexander prokin marek przewoźny jan růžička sergey k ryndevich michael schülke andré skale aleš smetana mikael sörensson the publication of the work was supported by the muséum de la ville de genève geneva switzerland

this work reflects modern concepts of systematics at the generic specific and subspecific levels and aims to update the now outdated catalogue by reiss tremewan 1967 and to bring stability into the nomenclature the author date and literature reference of each nominal taxon are cited together with full synonymies type localities of taxa at species and subspecies levels are provided as well as the range of each species and the distribution of each subspecies larval host plants are listed under each zygaenid species and vice versa and are also indexed by family and species literature references are annotated with the same key words that were used in the bibliography to which the catalogue is a companion and to which this work also contains an updating supplement it concludes with an index of valid nominal taxa and their synoymys

the ground beetle genus carabus coleoptera carabidae is one of the most intensively studied groups of insects for more than 200 years a huge amount of data has been accumulated on taxonomy biology phylogeny ecology and biogeography from the start in 1989 the aim of the project was to present a complete european summary combining data from both western and eastern europe the results are presented to the scientific community in the form of a thorough and attractive book which will be indispensable in the field of entomology ecology and biogeography

deals with research and scholarship in economic theory presents analytical interpretive and empirical studies in the areas of monetary theory fiscal policy labor economics planning and development micro and macroeconomic theory international trade and finance and industrial organization also covers interdisciplinary fields such as history of economic thought and social

economics
