containing papers presented at the 9th international conference on sustainable development and planning this volume brings together the work of academics policy makers practitioners and other international stakeholders and discusses new academic findings and their application in planning and development strategies assessment tools and decision making processes problems related to development and planning are present in all areas and regions of the world accelerated urbanisation has resulted in both the deterioration of the environment and quality of life taking into consideration the interaction between different regions and

developing new methodologies for monitoring planning and implementation new strategies can offer solutions mitigating environmental pollution and non sustainable use of available resources energy saving and eco friendly buildings have become an important part of modern day progress with emphasis on resource optimisation planning is a key part in ensuring that these solutions along with new materials and processes are efficiently incorporated planners environmentalists architects engineers and economists have to work collectively to ensure that present and future needs are met the papers in the book cover a number of topics including city planning regional planning rural developments sustainability and the built environment sustainability supply chain resilience environmental management energy resources cultural heritage quality of life sustainable solutions in emerging countries sustainable tourism learning from nature transportation social and political issues community planning un sustainable development goals and timber structures

this powerful reference features one hundred famous urban plans all drawn to the same scale each accompanied by a one page summary of the site discussing its history design and lessons for future urban design

as urban regions face the demand to decrease fossil fuel dependency many cities in the developing world are undertaking initiatives designed to create a greener city by aiming for a more sustainable form of urban development and to do so they need to evaluate existing modes of transportation and patterns of land use focusing on oslo an early leader in urban environmental policy making and a european green city award winner it argues that this evaluation must adopt and integrate two approaches firstly as a process of ecological modernization based on a combination of transit densification and mixed use development and secondly as an opportunity to reconsider the character and substance of the built environment as a reflection of natural values landscapes and natural resources of the wider region environmental debate and concern is widespread in oslo and this is reflected in its earlier planning decisions to leave intact large forest reserves its successful ecological restoration of the oslo fjord the importance of outdoor culture among its residents the relatively progressive political agenda of norway this book provides an opportunity for a critical assessment of the limitations and opportunities inherent in green oslo and suggests the need for much broader integrative approaches it concludes by highlighting lessons which other cities might learn from oslo

architecture was fundamental to the realization of welfare state policy in the nordic countries translating democratic ideals into concrete spatial materializations an inclusive notion of welfare for all was embraced by a generation of architects landscape architects and planners who labored to give physical form to ideas of equality collectivity and democracy producing a vast architectural output in scandinavia during the postwar years today however the architectural legacy of this era is contested welfare for all no longer enjoys the social or political consensus it once did this publication critically engages with this contested architectural legacy and provides a nuanced portrait of postwar welfare architecture coming to terms with a contentious past and facing an uncertain future with newly commissioned photographic work by contemporary nordic artists based on an interdisciplinary research project by kth stockholm oslo school of architecture university of copenhagen internationally renown contributors shed light on aspects of the relationship between architecture and welfare
