baofeng radio guide for beginners the baofeng story is pretty fascinating when you think about it the company emerged from china in the late 2000s with a mission that seemed almost too good to be true create high quality amateur radios at prices that wouldn't break the bank at the time the amateur radio world was dominated by expensive japanese brands and newcomers to the hobby often faced a significant financial barrier to entry baofeng changed all that with their first major success the uv 5r which hit the market around 2012 this little radio was a game changer here was a dual band handheld that offered features you'd typically find in radios costing three or four times as much the uv 5r could do vhf and uhf had decent power output and could be programmed with hundreds of channels most importantly it sold for around thirty dollars the amateur radio community's initial reaction was mixed to put it mildly some old timers were skeptical of anything coming out of china at such low prices questioning the build quality and wondering if these radios would interfere with other devices but as more people got their hands on the uv 5r and started using it word spread quickly that this was the real deal the uv 5r became legendary in amateur radio circles and for good reason it introduced countless people to the hobby who might never have gotten involved otherwise college students young professionals and people on tight budgets suddenly had access to capable amateur radio equipment the uv 5r didn't just succeed it spawned an entire ecosystem of affordable chinese radios that continues to this day following the success of the uv 5r baofeng released several

variations and improvements the uv 5ra added some refinements the uv 5rtp boosted the power output and the uv 82 series introduced a more ergonomic design with better separation of ptt and monitor buttons each model built upon the success of the previous ones while maintaining that crucial affordability factor get your copy
