3 edge methods and theory i turn now to some of my own reflections on this score some reflections my first proposition is that if we are interested in analyzing the performance and dynamic properties of the world s economies it is only at significant peril that comparative economists can overlook noneconomic or political factors this is not to say that it is illegitimate to abstract from non economic factors for particular purposes rather such abstraction should occur only with cognizance of the influences being suppressed i have argued elsewhere that the analytical compromise in suppressing noneconomic variables is greater for the study of planned than for market economies 7 borrowing from polanyi 8 it is claimed that in market systems the economic sphere is disembedded from separate and not subordinate to the political social and cultural spheres while in planned systems the economic sphere is embedded in the noneconomic spheres to be sure market economies are strongly affected by political and cultural factors but planned economies have and often exercise the potential to let political goals dominate in making production allocational or distributional choices indeed it is difficult in practice to separate out what are political and what are economic decisions in planned systems

this book is written in honor of horst brezinski and explores a wide and diverse range of topics related to comparative economic studies containing contributions from a number of former presidents of the european association for comparative economic studies the chapters discuss the hard budget constraint economic transformation in central eastern europe illiberal democracy sovereign wealth fund higher education the euro the shadow economy multinational companies and economic power additional attention is given to new areas of study such as the digital economy and sports economics this book aims to examine comparative economies across a wide range of geographical areas including china hungary the united kingdom poland and the united states and will be relevant to those interested in emerging and transition economies the political economy economic policy and international relations
