the vast majority of work in theoretical linguistics from a generative perspective is based on first language acquisition and performance the vast majority of work on second language acquisition is carried out by scholars and educators working within approaches other than that of generative linguistics in this volume this gap is bridged as leading generative linguists apply their intellectual and disciplinary skills to issues in second language acquisition the results will be of interest to all those who study second language acquisition regardless of their theoretical perspective and all generative linguists regardless of the topics on which they work

the endangered species act of 1973 esa is one of the most cherished and reviled laws ever passed it mandates protection and preservation of all the nation s species and biodiversity whatever the cost it has been a lightning rod for controversy and conflicts between industry business and environmentalists the year 2023 marks the 50th anniversary of this law and provides an opportunity for a measured and thorough evaluation thereof we cannot know today s challenges and opportunities without understanding their histories this book is the most comprehensive history of the esa ever published and the first to consider the entire history of the law from all angles in a single volume the history of the esa has been one of increasing impact complexity and controversy in 1978 the supreme court declared that congress intended for the u s government to save all species at any cost and thereafter application of the esa became steadily more controversial as seen in the example of the northern spotted owl and the timber wars in the pacific northwest in the late 1980s and early 90s and then everywhere as the esa became a political football in the highly partisan environment of the late 1990s and amendments to the law ceased this book is not only a history but a call to action it will take more conservation more funding and more innovative solutions if we are to save our wildlife and biodiversity it will take the engagement to every american to muster the collective will to meet this challenge the hope of this book is that we will be able to look back and say that we accomplished more in the second 50 years of the esa than we did in the first
