edited and with an introduction by gordon marino basic writings of existentialism unique to the modern library presents the writings of key nineteenth and twentieth century thinkers broadly united by their belief that because life has no inherent meaning humans can discover we must determine meaning for ourselves this anthology brings together into one volume the most influential and commonly taught works of existentialism contributors include simone de beauvoir albert camus fyodor dostoevsky ralph ellison martin heidegger s̄ren kierkegaard friedrich nietzsche jean paul sartre and miguel de unamuno y jugo

this first collection of sartre s key philosophical writings provides an indispensable resource for all students and readers of his work which has been extremely influential in philosophy literature and politics

a meridan book

there are already many excellent books on existentialism some of them deal with particular problem or particular existentialist writers most of those that deal with existentialism as a whole divide their subject matter according to authors presenting chapters on kierkegaard heidegger sartre and the rest thus i think that there is room for the present book which attempts a comprehensive examination and evaluation of existentialism but does so by thematic treatment that is to say each chapter deals with a major theme of existentialist philosophy and these

themes are arranged in the order of the existential dialect of course each chapter is illustrated with material from the writings of existentialists from kierkegaard to camus

best known as the author of twenty six novels iris murdoch has also made significant contributions to the fields of ethics and aesthetics collected here for the first time in one volume are her most influential literary and philosophical essays tracing murdoch s journey to a modern platonism this volume includes incisive evaluations of the thought and writings of t s eliot jean paul sartre albert camus simone de beauvoir and elias canetti as well as key texts on the continuing importance of the sublime on the concept of love and the role great literature can play in curing the ills of philosophy existentialists and mystics not only illuminates the mysticism and intellectual underpinnings of murdoch s novels but confirms her major contributions to twentieth century thought

a collection of essays by jean paul sartre that touch upon the subject of existentialism by looking at aesthetics emotions writing phenomenology and perception the philosophy of existentialism collects representative essays on jean paul sartre s pioneering subject existentialism beginning with a thoughtful introduction by fellow french philosopher jean wahl this worklooks at existentialism through several lenses exploring topics such as the emotions imagination nothingness freedom responsibility and the desire to be god by providing exposition on a variety of subjects the philosophy of existentialism is a valuable introduction to sartre s ideas

the existentialist legacy and other essays on philosophy and religion is a collection of ten essays on topics in the two primary areas of the author s research and teaching existentialist philosophy and the philosophy of religion the common thread running through the essays is a way of approaching issues in philosophy and religion that reflects the author s career long indebtedness to the methods and emphases of the existentialist movement in philosophy among the essay topics are studies of the existentialist legacy in the context of the contemporary situation in the sciences and humanities iris murdoch s sympathetic but narrowly sartrian interpretation of existentialism the congeniality of existentialism and feminism the problem with high existentialist doctrines of freedom three philosophical autobiographies a new look at pascal s wager as a description of the situation of the modern believer theistic evolutionism including a christian existentialism and walter kaufmann as an existentialist manqu? in his heretical approach to religion

a collection of one man s essays in book form tends to be viewed today with some suspicion if not hostility by philosophical critics it would seem that the author is guilty of an academic sin of pride causing or helping to cause separately conceived articles to surpass their original

station and assume a new life a grander articulation it can hardly be denied that the essays which follow must face this sullen charge for they were composed at different times for different sorts of audiences and for the most part have already been published their appearance in a new form will not allay commonplace criticisms there are repetitions certain key terms are defined and defined again in various places a few quotations reappear and beyond this the essays are unequal in range depth and fundamental intent but it is what brings these essays together that constitutes i trust their collective merit underlying the special arguments that are to be found in each of the chapters is a particular sense of reality not a thesis or a theory but rather a way of seeing the world and of appreciating its texture and design it is that sense of reality that i should like to speak of here philosophy stands in a paradoxical relationship to mundane existence it is at once its critique and one of its possibilities

in this study the author makes a comparison between the two main types of existentialism the christian and the non christian the comparison is made on four levels first the common situation second the possibility and means of communication third the chosen methods of philosophy and fourth the attitude and interpretations in relation to similar subjects although the french existentialists have been greatly influenced by kierkegaard and by contemporary existentialist thought in germany switzerland italy spain and the united states the study is limited to the existentialism of contemporary french writers france in the last fifty years has experienced some of the most crucial events of her history and this common setting for both christian and non christian man turns to christianity and another militant atheism it is particularly in france that the split is most clearly made between these two varieties of existentialist thought dr kingston handles the issues in a fair and honest way neither concealing his own position nor dealing unfairly with those of whom he is most critical the intelligent english reader lay or academic will find this an excellent introduction to a whole area of modern french life and thought with which he is unlikely to be well acquainted
