L'aviazione legionaria citata anche come aviación legionaria nella letteratura in lingua spagnola era un corpo di spedizione della regia aeronautica italiana che venne creato nel 1936 per fornire supporto logistico e tattico alle truppe guidate da Francisco Franco durante la guerra civile spagnola opera su due volumi con numerose fotografie d'epoca in b/n viene qui rappresentata l'opera degli uomini e delle macchine che hanno caratterizzato la nostra aeronautica in quel travagliato periodo storico in Spagna negli anni 1936-1939

The Macchi C.202 was probably the most successful Italian fighter during the Second World War. It is generally agreed that the performance of the Macchi was superior to both the Hawker Hurricane and the Curtiss P-40 Kittyhawk and on a par with the Supermarine Spitfire Mk V. It is not by chance that virtually all the Italian top scoring aces flew this plane either with the Regia Aeronautica or the Aeronautica Nazionale Repubblicana. At the same time the MC.202 is the symbol of the dysfunctions in the Italian military industrial complex: the lack of sound industrial planning resulting in orders from the Regia Aeronautica for an exaggerated number of different

aircraft the lack of the development of adequate engines limiting aircraft performance and reducing capacity to house weapons with a proper punch the corruption of politics and the culpable connivance of the high military spheres the mc 202 was therefore produced in limited numbers while there is consensus that air war especially in the african theatre would have been different had the aircraft been adopted before
