in the late nineteenth century medical educators intent on transforming american physicians into scientifically trained elite professionals recognized the value of medical school design for their reform efforts between 1893 and 1940 nearly every medical college in the country rebuilt or substantially renovated its facility in building schools making doctors katherine carroll reveals how the schools constructed during this fifty year period did more than passively house a remodeled system of medical training they actively participated in defining and promoting an innovative pedagogy modern science and the new physician interdisciplinary and wide ranging her study moves architecture from the periphery of medical education to the center uncovering a network of medical educators architects and philanthropists who believed that the educational environment itself shaped how students learned and the type of physicians they became carroll offers the first comprehensive study of the science and pedagogy formulated by the buildings the influence of the schools

donors and architects the impact of the structures on the urban landscape and the local community and the facilities privileging of white men within the medical profession during this formative period for physicians and medical schools

written by eminent education scholar thomas neville bonner becoming a physician is a groundbreaking comprehensive history of western medical education the only work of its kind it covers the united states great britain france and germany comparative in focus the narrative unfolds within the context of social political and intellectual transformations that occurred in europe and north america between the enlightenment and nazi germany viewing the late eighteenth century as a watershed in the development of medical education bonner begins by describing how earlier practices evolved in the 1800s with the introduction of clinical practices he then traces the growth of laboratory teaching in the nineteenth century and the twentieth century preoccupation with establishing a university standard of medical education throughout bonner pays particular attention to the students chronicling their daily lives and discussing changes in the medical school population and the various biases class gender racial and religious students and prospective students faced

this book reimagines the education of medical students in its entire scope from first year to graduation the educational blueprint presented here rests on a new definition of sickness one focused on impairments of function as the primary issue of concern for both patients and their care givers this perspective avoids the common shift of medical attention from persons to diseases and thus provides the basis for an authentic and robust patient centered mindset

over 10 000 monographs currently in print about practice and research in the medical and biomedical sciences entries arranged by general medical specialties e g allergy geriatrics surgery then by subspecialties or other topics and then by authors most entries include author title publisher publication date pages price and brief annotation author index
