David Abram's first book *The Spell of the Sensuous* has become a classic of environmental literature. Now he returns with a startling exploration of our human entanglement with the rest of nature as the climate veers toward catastrophe. The innumerable losses cascading through the biosphere make vividly evident the need for a metamorphosis in our relation to the living land. For too long we've ignored the wild intelligence of our bodies taking our primary truths from technologies that hold the living world at a distance. Abram's writing subverts this distance, drawing readers ever closer to their animal senses in order to explore from within the elemental kinship between the human body and the breathing earth. The shape shifting of ravens, the erotic nature of gravity, the eloquence of thunder, the pleasures of being edible—all have their place in this book.

Welcome to a world of subversive literature filled with magical wisdom and the decoding of the occult. In this volume author Azazel Rama explores the ancient secrets of astral travel and reveals a doorway to the multiverse of endless potential. He then reveals how the heretical views of science and nature can slay the dragon of religion with common sense. This is not a self-help seminar filled with happy sunshine nonsense codes and false rainbows. This is a journey into the forbidden: the church of the free mind has opened its gates and within this holy temple no messiah shall be said to exist. Written as a diatribe against words, this is the true philosophy of a snake swallowing its own tail. Behold the self-consuming god that exists within the flesh and souls of all living beings. Embark upon a spiritual exploration of a higher order of freedom as it relates to an unconsciously connected society of human animals and learn the moral codes of mother nature as she echoes a sense of natural law through the depths of our collective being. This collection of essays proposes a way to enter a new cycle of human understanding.

This volume is a collection of essays analyzing different issues concerning the nature, possibility, and desirability of heaven as understood by the Abrahamic faiths of Judaism, Christianity, and Islam. Topics include whether or not it is possible that a mortal could, upon bodily death, become an inhabitant of heaven without loss of identity; where exactly heaven might be located; whether or not everyone should be saved; or if there might be alternative destinations, including some less fiery versions of hell. Chapter authors include believers and skeptics, well-known philosophers, and new voices. While some chapters are more challenging than others, all are written in a style that should be accessible to any interested reader.
