renowned work has been fully revised and expanded by a team of leading chemical and process engineers working under the guidance of one of the world's chief experts in this field. Sam Mannan is professor of chemical engineering at Texas A&M University and heads the Mary Kay O'Connor Process Safety Center at Texas A&M. He received his MS and PhD in chemical engineering from the University of Oklahoma and joined the chemical engineering department at Texas A&M University as a professor in 1997. He has over 20 years of experience as an engineer working both in industry and academia. New detail is added to chapters on fire safety engineering, explosion hazards analysis and suppression, and new appendices feature more recent disasters. The many thousands of references have been updated along with standards and codes of practice issued by authorities in the US, UK, Europe, and internationally. In addition to all this more regulatory relevance and case studies have been included in this edition. Written in a clear and concise style, loss prevention in the process industries covers traditional areas of personal safety as well as the more technological aspects and thus provides balanced and in-depth coverage of the whole field of safety and loss prevention. A must have standard reference for chemical and process engineering safety professionals, the most complete collection of information on the theory, practice, design elements, equipment, and laws that pertain to process safety. Only single work to provide everything principles, practice, codes, standards, data, and references needed by those practicing in the field.
