the tactile eye expands on phenomenological analysis and film theory in its accessible and beautifully written exploration of the visceral connection between films and their viewers. Jennifer M. Barker argues that the experience of cinema can be

understood as deeply tactile a sensuous exchange between film and viewer that goes beyond the visual and aural gets beneath the skin and reverberates in the body barker combines analysis of embodiment and phenomenological film theory to provide an expansive description of cinematic tactility she considers feminist experimental film early cinema animation and horror as well as classic modernist and postmodern cinema films from ten national cinemas and work by chuck jones buster keaton the quay brothers satyajit ray carolee schneemann and tom tykwer among others

the practice of blurring the line between score and sound design has transformed contemporary film soundscape by challenging not only the long established hierarchical relationships between dialogue music and sound effects but also the modes of perception shaped by classical soundtrack practices the methods of this new trend rely on the language of contemporary popular and art music producing soundtracks in which it is difficult to tell the difference between score and ambient sound where pieces of electroacoustic music are merged with diegetic sound sound effects are absorbed into the score or treated as music and diegetic sound is treated as *musique concrète* in sound design is the new score kulezic wilson explores theoretical aesthetic and sensuous dimensions of this new trend providing a multifaceted portrait of a practice which recognizes the interconnectedness of all soundtrack elements and emphasizes their inherent musicality the

aesthetic concerns of this practice are illuminated through the concept of the aesthetics of reticence which rejects classical narrative and scoring conventions and uses integrated soundtrack strategies to create the space for mystery in art and for individuality in the cinematic experience the book's emphasis on sensuous and musical aspects of this practice informed by the feminist discourse on the erotics of art challenges popular notions about sensory cinema demonstrating that the sensuousness of film form and its soundscapes is more sophisticated than simply being the result of excessive sensory stimulation facilitated by the use of digital technology or the intensified aesthetics it inspires the discussion is supported by a wide range of case studies from american independent asian australian and european cinemas including films by shane carruth claire denis hou hsiao hsien harmony korine david michôd gus van sant and peter strickland

what is the relationship between cinema and spectator this is the key question for film theory and one that thomas Elsaesser and malte hagener put at the center of their insightful and engaging book now revised from its popular first edition every kind of cinema and every film theory first imagines an ideal spectator and then maps certain dynamic interactions between the screen and the spectator's mind body and senses using seven distinctive configurations of spectator and screen that move progressively from exterior to interior relationships the authors retrace the most important stages of film theory from its beginnings to the present from neo realist and modernist theories to psychoanalytic apparatus phenomenological and cognitivist theories and including recent cross overs with philosophy and neurology this new and updated edition of film theory an introduction through the senses has been extensively revised and rewritten throughout incorporating discussion of contemporary films like her and gravity and including a greatly expanded final chapter which brings film theory fully into the digital age
