early new england the book describes in vivid detail the magical techniques used by settlers and the assumptions which underlaid them godbeer argues that layfolk were generally far less consistent in their beliefs and actions than their ministers would have liked even church members sometimes turned to magic the devil's dominion reveals that the relationship between magical and religious belief was complex and ambivalent some members of the community rejected magic altogether but others did not godbeer argues that the controversy surrounding astrological prediction in early new england paralleled clerical condemnation of magical practice and that the different perspectives on witchcraft engendered by magical tradition and puritan doctrine often caused confusion and disagreement when new englanders sought legal punishment of witches

this volume contains a series of provocative essays that explore expressions of magic and ritual power in the ancient world the essays are authored by leading scholars in the fields of egyptology ancient near eastern studies the hebrew bible judaica classical greek and roman studies early christianity and patristics and coptic and islamic egypt the strength of the present volume lies in the breadth of scholarly approaches represented the book begins with several papyrological studies presenting important new texts in greek and coptic continuing with essays focusing on taxonomy and definition the concluding essays apply contemporary theories to analyses of specific test cases in a broad variety of ancient mediterranean cultures

keith thomas's classic study of all forms of popular belief has been influential for so long now that it is difficult to remember how revolutionary it seemed when it first appeared by publishing religion and the decline of magic thomas became the first serious scholar to attempt to synthesize the full range of popular thought about the occult and the supernatural studying its influence across europe over several

~~centuries at root his book can be seen as a superb exercise in problem solving one~~

that actually established magic as a historical problem worthy of investigation thomas asked productive questions not least challenging the prevailing assumption that folk belief was unworthy of serious scholarly attention and his work usefully reframed the existing debate in much broader terms allowing for more extensive exploration of correlations not only between different sorts of popular belief but also between popular belief and state religion it was this that allowed thomas to reach his famous conclusion that the advent of protestantism which drove out much of the superstition that characterised the catholicism of the period created a vacuum filled by other forms of belief for example catholic priests had once blessed their crops but protestants refused to do so that left farmers looking for other ways of ensuring a good harvest it was this thomas argues that explains the survival of what we now think of as magic at a time such beliefs might have been expected to decline at least until science arose to offer alternative paradigms

every culture makes the distinction between true religion and magic regarding one action and its result as miraculous while rejecting another as the work of the devil surveying such topics as babylonian witchcraft jesus the magician magic in hasidism and kabbalah and magic in anglo saxon england these ten essays provide a rigorous examination of the history of this distinction in christianity and judaism written by such distinguished scholars as jacob neusner hans penner howard kee tzvi abusch susan r garrett and moshe idel the essays explore a broad range of topics including how certain social groups sort out approved practices and beliefs from those that are disapproved providing fresh insight into how groups define themselves magic as an insider s term for the outsider s religion and the tendency of religious traditions to exclude the magical in addition the collection provides illuminating social cultural and anthropological explanations for the prominence of the magical in certain periods and literatures
