more precisely provides a rigorous and engaging introduction to the mathematics necessary to do philosophy it is impossible to fully understand much of the most important work in contemporary philosophy without a basic grasp of set theory functions probability modality and infinity until now this knowledge was difficult to acquire professors had to provide custom handouts to their classes while students struggled through math texts searching for insight more precisely fills this key gap eric steinhart provides lucid explanations of the basic mathematical concepts and sets out most commonly used notational conventions furthermore he demonstrates how mathematics applies to many fundamental issues in branches of philosophy such as metaphysics philosophy of language epistemology and ethics

in eliminativism objects and persons jiri benovsky defends the view that he doesn t exist in this book he also defends the view that this book itself doesn t exist but this did not prevent him to write the book and although in benovsky s view you don t exist either this does not prevent you to read it benovsky defends a brand of non exceptionalist eliminativism some eliminativists typically focusing on ordinary material objects such as chairs and hammers make exceptions for instance for blue whales that is living beings or for persons that is conscious organisms benovsky takes one by one all types of allegedly existing objects like chairs whales and persons and shows that from the metaphysical point of view they are more trouble than they are worth we are much better off without them he thus defends an eliminativist view about ordinary objects as well as the no self view where he explores connections between metaphysics phenomenology and buddhist thought he then also considers the case of aesthetic objects focusing on musical works and photographs and shows that the claim of their non existence solves the many problems that arise when one tries to find an appropriate ontological category for them and that such an eliminativist view is more natural than what we might have thought the arguments provided here are always topic specific each type of entity is given its own type of treatment thus proving a varied and solid foundation for a generalized non exceptionalist full blown eliminativist worldview
