here gathered for the first time is a collection of Loveday Alexander's critically acclaimed essays on the Acts of the Apostles. In this collection of essays, Alexander addresses the central question: what kind of book is Acts? She approaches the text of Acts with a finely tuned sense of the complexities of the conventional codes that governed reading and writing in the classical world and argues that the differences between New Testament texts and contemporary writings in the Graeco-Roman world can be as revealing as the similarities. The collection begins with Alexander's classic analysis of the literary codes governing the Preface to Luke's two-volume work, in which she challenges the dominant consensus that the language and structure of the Preface evoke the generic conventions of Greek historiography. That insight opens up the possibility of reading Acts alongside other ancient literary genres: the lives of the Greek philosophers, the Greek novels of Chariton and Xenophon of Ephesus, Roman itineraries, Greek and Jewish apologetic, and Latin epic. The process, like the narrative of Acts itself, becomes a rich and evocative voyage of exploration, shedding light both on the varied social worlds of the author and his first readers and on the complex communication problems underlying the creation of early Christian discourse. This is volume 289 in the *Journal for the Study of the New Testament Supplement Series* and is also part of the *Early Christianity in Context Series*.

This is the first textbook of forensic medicine and toxicology which has been written primarily for a homeopathy student. The book is illustrated with a number of pictures, diagrams, and illustrations. A number of memory aids have also been provided to help the student in remembering essential information easily.

Complete with headnotes, summaries of decisions, statements of cases, points and authorities of counsel, annotations, tables, and parallel references.

In this stimulating volume, Larry D. Barnett locates a fundamental defect in widespread assumptions regarding the institution of law. He asserts that scholarship on law

is being led astray by currently accepted beliefs about the institution and as a result progress in understanding law as a societal institution will be impeded until a more accurate view of law is accepted this book takes on this challenge the place of law addresses two questions that are at the heart of the institution of law why is law an evidently universal enduring institution in societies characterized by a relatively high level of economic development and a relatively high degree of social complexity and why do the concepts and doctrines of the institution of law differ between jurisdictions states or nations at one point in time and vary within a particular jurisdiction over time these two questions barnett believes should be prominent in any study of law the framework for law barnett proposes is concerned with activities that are fundamental aspects of social organization that is activities that are deeply embedded in social life his viewpoint is grounded on a body of quantitative research pertinent to the societal sources and limits of law barnett argues that this perspective applies only to law in sovereign democratic nations that are economically advanced and socially complex in other environments law s place as a societal institution is less secure this innovative perspective will do much to enhance understanding and appreciation of the role of law in modern societies
