the concept of a risk based approach to data protection came to the fore during the overhaul process of the eu s general data protection regulation gdpr at its core it consists of endowing the regulated organizations that process personal data with increased responsibility for complying with data protection mandates such increased compliance duties are performed through risk management tools this book provides a comprehensive analysis of this legal and policy development which considers a legal historical and theoretical perspective by framing the risk based approach as a sui generis implementation of a specific regulation model known as meta regulation this book provides a recollection of the policy developments that led to the adoption of the risk based approach in light of regulation theory and debates it also discusses a number of salient issues pertaining to the risk based approach such as its rationale scope and meaning the role for regulators and its potential and limits the book also looks at they way it has been undertaken in major statutes with a focus on key provisions such as data protection impact assessments or accountability finally the book devotes considerable attention to the notion of risk it explains key terms such as risk assessment and management it discusses in depth the role of harms in data protection the meaning of a data protection risk and the difference between risks and harms it also critically analyses prevalent data protection risk management methodologies and explains the most important caveats for managing data protection risks

this book predicts the decline of today s professions and introduces the people and systems that will replace them in an internet enhanced society according to richard susskind and daniel susskind we will neither need nor want doctors teachers accountants architects the clergy consultants lawyers and many others to work as they did in the 20th century the future of the professions explains how increasingly capable technologies from telepresence

to artificial intelligence will place the practical expertise of the finest specialists at the fingertips of everyone often at no or low cost and without face to face interaction the authors challenge the grand bargain the arrangement that grants various monopolies to today's professionals they argue that our current professions are antiquated opaque and no longer affordable and that the expertise of their best is enjoyed only by a few in their place they propose five new models for producing and distributing expertise in society the book raises profound policy issues not least about employment they envisage a new generation of open collared workers and about control over online expertise they warn of new gatekeepers in an era when machines become more capable than human beings at most tasks with a new preface exploring recent critical developments this updated edition builds on the authors groundbreaking research into more than a dozen professions illustrated with numerous examples from each this is the first book to assess and question the relevance of the professions in the 21st century
