over the past century educational psychologists and researchers have posited many theories to explain how individuals learn i e how they acquire organize and deploy knowledge and skills the 20th century can be considered the century of psychology on learning and related fields of interest such as motivation cognition metacognition etc and it is fascinating to see the various mainstreams of learning remembered and forgotten over the 20th century and note that basic assumptions of early theories survived several paradigm shifts of psychology and epistemology beyond folk psychology and its naïve theories of learning psychological learning theories can be grouped into some basic categories such as behaviorist learning theories connectionist learning theories cognitive learning theories constructivist learning theories and social learning theories learning theories are not limited to psychology and related fields of interest but

rather we can find the topic of learning in various disciplines such as philosophy and epistemology education information science biology and as a result of the emergence of computer technologies especially also in the field of computer sciences and artificial intelligence as a consequence machine learning struck a chord in the 1980s and became an important field of the learning sciences in general as the learning sciences became more specialized and complex the various fields of interest were widely spread and separated from each other as a consequence even presently there is no comprehensive overview of the sciences of learning or the central theoretical concepts and vocabulary on which researchers rely the encyclopedia of the sciences of learning provides an up to date broad and authoritative coverage of the specific terms mostly used in the sciences of learning and its related fields including relevant areas of instruction pedagogy cognitive sciences and especially machine learning and knowledge engineering this modern compendium will be an indispensable source of information for scientists educators engineers and technical staff active in all fields of learning more specifically the encyclopedia provides fast access to the most relevant theoretical terms provides up to date broad and authoritative coverage of the most important theories within the various fields of the learning sciences and adjacent sciences and communication technologies supplies clear and precise explanations of the theoretical terms cross references to related entries and up to date references to important research and publications the encyclopedia also contains biographical entries of individuals who have substantially contributed to the sciences of learning the entries are written by a distinguished panel of researchers in the various fields of the learning sciences

this annually updated text is a compilation of magazine newspaper and journal articles in the area of business ethics

this book provides up to date comprehensive and accurate information on the diagnostic imaging of nontraumatic abdominal emergencies in pediatric patients all of the most common neonatal and pediatric emergencies are covered with separate discussion of diseases that occur more commonly in newborns and those typically encountered later in childhood for each condition the main signs observed using the various imaging techniques x ray ultrasonography computed tomography and magnetic resonance are described and illustrated with the aid of a wealth of images attention is drawn to those features of particular relevance to differential diagnosis and the prognostic value of diagnostic imaging is also explained the final section addresses topics of special interest including the acute onset of abdominal neoplasms the problems associated with radiation protection in the emergency setting and medicolegal issues and informed content the book will be of value for all radiologists working in emergency settings in which pediatric patients newborn and children accessing the emergency department are regularly examined

excerpts from criticism of the works of novelists poets playwrights and other creative writers 1900 1960

the tracks north is the only book length study devoted to the railroad bracero program and the only one to provide such a clear picture of the internal workings of the program in mexico mining a wealth of materials seldom used by investigators of the bracero program barbara driscoll examines the program s historical antecedents and the national and international factors and negotiations that led to its creation she then explores in comprehensive detail the program s

operations in both countries as well as its singular place in the history of the u s mexican relations publisher s description
