political commentators were surprised at the re emergence of right wing parties in western europe in the 1970s and early 1980s given that right wing extremists had largely disappeared from successful electoral politics after the end of the second world war since their resurgence such parties have become permanent fixtures across europe the re invention of the european radical right examines what accounts for their initial rise and their continued success as well as how they should be classified are they fascist neo fascist radical extreme or populist

this volume had its origin in a symposium on the reproduction and development of cartilaginous fishes that was held at the annual meetings of the american elasmobranch society and the american society of ichthyologists and herpetologists in charleston south carolina in 1990 the cartilaginous fishes class chondrichthyes are a large and diverse group of fishes that include approximately 900 to 1100 living species of sharks skates rays and ratfishes throughout their history which dates back at least 400 million years they have been a successful major component of the marine ecosystem the chondrichthyan fishes occupy a pivotal position in comparative and evolutionary studies of vertebrate reproduction and development they are the oldest surviving group of jawed vertebrates and they possess both the adult vertebrate bauplan and the vertebrate program of embryonic development the major features of the female reproductive system including its embryonic origin structure physiological function and biochemistry apparently were established early in vertebrate evolution and are fully developed in chondrichthyan fishes these features of the female reproductive system have been retained during the evolution of the other classes of vertebrates much the same can be said for the male reproductive system moreover viviparity placental nourishment of developing embryos and the hormonal regulation of these events made an initial appearance in this group the 22 articles presented in this volume bring together a wide variety of complementary research by investigators from seven countries allowing us to broaden the scope and implications of our studies while identifying opportunities for future research the appearance of a volume on the reproduction and development of cartilaginous fishes is quite opportune the continued existence of these fishes which survived the great extinction events of earth s history is now threatened by overexploitation unless immediate steps for their conservation are undertaken knowledge of their reproduction and development not only is an end in itself but is of critical importance in devising successful conservation and resource management strategies

this book argues that the viability of many observed market and non market interventions in agricultural products worldwide depends considerably on the underlying behaviour of the relevant commodity markets many of these policies have had distortive impacts resulting in much discussion and controversy in the context of the world trade organization wto doha round of trade negotiations

this title was first published in 2000 providing a review and assessment of a number of the major features evident in regional planning and development in europe this volume contains a series of regional case studies drawn from current research in various european countries these illustrate a broad range of theoretical views which offer perspectives on the operation of the eu structural funds and regional restructuring development and key concerns evident in spatial planning an environmental management and lessons from past experience the editors collate views to arrive at challenging conclusions and suggestions for future policy priorities

peace is one of the most sought after commodities around the world and as a result individuals and countries employ a variety of tactics to obtain it one of the most common practices used to accomplish peace is negotiation with its elevated role in the dialogue surrounding peace negotiation is often steeped in politics and focused on managing parties in conflict however the art and science of negotiation can and should be viewed more broadly to include a psychological and cognitive approach psychological and political strategies for peace negotiation gathers the foremost authors in the field and combines their expertise into a volume which addresses the complexity of peace negotiation strategies to further underscore the importance of successful negotiation strategies the editors have also included the unique perspective of authors with personal experience with political upheaval in serbia and lebanon though each chapter focuses on a different topic they are integrated to create a foundation for future research and practice specific topics included in this volume embrace changing minds and the multiple intelligence mi framework personal schemas in the negotiation process escalation of image in international conflicts representative decision making transformative leadership for peace negotiation psychological and political strategies for peace negotiation is an essential reference for psychologists negotiators mediators and conflict managers as well as for students and researchers in international cross cultural and peace psychology studies

includes entries for maps and atlases

successor to the classic work in shark studies the elasmobranch fishes by john franklin daniel first published 1922 revised 1928 and 1934 sharks skates and rays provides a comprehensive and up to date overview of elasmobranch morphology coverage has been

expanded from anatomy to include modern information on physiology and biochemistry the new volume also provides equal treatment for skates and rays the authors present general introductory material for the relative novice but also review the latest technical citations making the book a valuable primary reference resource more than 200 illustrations supplement the text
