we have an uneasy relationship with the relentless deluge of information gushing out of academia and our media outlets to turn it off is escapist but to attempt to cognitively grapple with it is overwhelming in unforgettable enabling deep and durable learning a nationally recognized master teacher gives professors and their students the means to chart a clear path through this information explosion humans crave explanatory patterns and this book enables teachers to think deeply about their academic disciplines to find and articulate their core explanatory principles and to engage their students in a compelling way of thinking an alternative title for this book could be why the best college teachers do what they do because the author articulates a compelling rationale that will equip faculty to create and deliver transformative courses students in transformative courses grapple with essential questions and gain mental muscle that equips them for real world challenges

packed with exercises checklists and how to sections the robust lab manual for statistical analysis by dawn m mcbride and j cooper cutting gives students hands on guidance and practice for analyzing their own psychological research the lab manual's four sections include activities that correspond directly with the chapters of mcbride's the process of statistical analysis in psychology activities related to data analysis projects including data sets that students can manipulate and analyze activities designed to help students choose the correct test for different types of data and exercises designed to help students write up results from analyses in apa style

employ cognitive theory in the classroom every day research into how we learn has opened the door for utilizing cognitive theory to facilitate better student learning but that's easier said than done many books about cognitive theory introduce radical but impractical theories failing to make the connection to the classroom in small teaching james lang presents a strategy for improving student learning with a series of modest but powerful changes that make a big difference many of which can be put into practice in a single class period these strategies are designed to bridge the chasm between primary research and the classroom environment in a way that can be implemented by any faculty in any discipline and even integrated into pre existing teaching techniques learn for example how does one become good at retrieving

knowledge from memory how does making predictions now help us learn in the future how do instructors instill fixed or growth mindsets in their students each chapter introduces a basic concept in cognitive theory explains when and how it should be employed and provides firm examples of how the intervention has been or could be used in a variety of disciplines small teaching techniques include brief classroom or online learning activities one time interventions and small modifications in course design or communication with students

this proceedings contains many research and practical papers dealing with the impact and influence of information technology on the global economy

like its predecessors volume iii of the handbook for teaching introductory psychology provides introductory psychology instructors with teaching ideas and activities that can immediately be put into practice in the classroom it contains an organized collection of articles from teaching of psychology top the official journal of the society for the teaching of psychology division 2 of the american psychological association volume iii contains 89 articles from top that have not been included in other volumes another distinction between this volume and its predecessors is its emphasis on testing and assessment the book is divided into two sections section one issues and approaches in teaching introductory psychology contains 52 articles on critical issues such as how to approach the course understanding students interests perceptions and motives students existing knowledge of psychology including their misconceptions a comparison of introductory textbooks and tips on how to evaluate them test questions and student factors affecting exam performance an overview of different forms of feedback giving extra credit and how to deal with academic dishonesty section two consists of 37 articles that present demonstrations class and laboratory projects and other techniques to enhance teaching and learning in both the introductory as well as advanced courses in the discipline this section is organized so as to parallel the order of topics found in most introductory psychology textbooks intended for academicians who teach the introductory psychology course and or oversee grad assistants who teach the course all royalties of the book go directly to the society for the teaching of psychology to promote its activities to further improve the teaching of psychology

although new forms of learning call for new forms of assessment many faculty struggle to find different ways of testing their students achievements this issue introduces readers to both theory and practical examples of innovations in assessment in the college classroom examples include authentic testing testing with multimedia portfolios visual synthesis and performance based testing among others contributors also argue that student performance on exams can be improved by techniques that can be implemented both before and after the exam to make the students better learners this is the 100th volume of the jossey bass quarterly report series new directions for teaching and learning

mastering mathematics offers specific concrete methods for succeeding in math courses the book begins with a diagnostic questionnaire to help students determine the areas where they need the most improvement in their approach and study habits for math part i deals with attitude part ii gives practical advice on how to handle class time class notes study time and homework part iii deals with preparing for exams

classroom assessment principles and practice for effective standards based instruction

often students enter and slip through school without the proper skills necessary to learn in other words they need to learn how to learn graduates sometimes forget the skills they acquired in school and need to relearn learning in order to succeed in the workplace this book provides important and necessary instruction on how to learn with a focus on teaching learning strategies rather than the more narrow study skills this book covers motivation time management learning principles test review test taking and real world strategies it also addresses important topics such as test anxiety notetaking writing and study groups an ideal tool for teachers who want to teach their students proper learning skills or for the returning student who needs to brush up their technique
