philosophers both western and eastern have long been divided between humanists for whom man is the measure of things and their opponents who claim that there is a way in principle knowable and describable that the world anyway is independent of human perspectives and interests the early chapters of the measure of things chart the development of humanism from medieval times through the renaissance enlightenment and romantic periods to its most sophisticated twentieth century form existential humanism cooper does not identify this final position with that of any particular philosopher though it is closely related to those of heidegger merleau ponty and the later wittgenstein among the earlier figures discussed are william of ockham kant herder nietzsche and william james having rejected attempts by contemporary advocates of modest or non metaphysical realism to dissolve the opposition between humanism and its absolutist rival cooper moves on to an adjudication of that rivalry prompted by the pervasive rhetoric of hubris that the rivals direct against one another he argues in an original manner that the rival positions are indeed guilty of lack of humility absolutists whether defenders of the given or scientific realists exaggerate our capacity to ascend out of our engaged perspectives to an objective account of the world humanists conversely exaggerate our capacity to live without a sense of our subjection to a measure independent of our own perspectives the only escape cooper maintains from the impasse reached when humanism and absolutism are both rejected lies in a doctrine of mystery there is a reality independent of the human contribution but it is necessarily ineffable drawing in a novel way upon the buddhist conception of emptiness and heidegger s later writings the final chapters defend the notion of mystery distinguish the doctrine advanced from that of transcendental idealism and propose that it is only through appreciation of mystery that measure and warrant may be provided for our beliefs and conduct

policy based network management pbnm systems enable business rules and procedures to be translated into policies that configure and control the network and its services those who manage network systems are aware that this approach can benefit both network management as well as the development of applications that use network services however the details surrounding these systems has been obscured by marketing hype numerous acronyms and theoretical complexities

policy based network management solutions for the next generation cuts through the hype surrounding pbnm and makes it approachable for those who really need to understand what it has to offer the author founder of the ietf policy framework working group discusses system requirements information models and system components for policy based management he also provide practitioners with a resource for developing and or incorporating pbnm systems as network systems become larger and more complex creating policies for them has become a crucial step in the management of network systems and this book is a welcome addition to this exciting approach presents a completely new approach to pbnm that unites the business system and implementation spheres as the basis for examples and discussion uses the den ng information model an easy to understand open standard tied closely to etom and ngoss introduces the ponder system then examines ponder extensions designed to enhance the structure of high level policies and their application in a pbnm system filled with examples illustrating how policies are most effectively used in a pbnm system and what new directions pbnm is likely to take

what is art why should we value it and what allows us to say that one work is better than another traditional answers have emphasized aesthetic form but this has been challenged by institutional definitions of art and postmodern critique the idea of distinctively artistic value based on aesthetic criteria is at best doubted and at worst rejected this book however champions these notions in a new way it does so through a rethink of the mimetic definition of art on the basis of factors which traditional answers neglect namely the conceptual link between art s aesthetic value and non exhibited epistemological and historical relations these factors converge on an expanded notion of the artistic image a notion which can even encompass music abstract art and some conceptual idioms the image s style serves to interpret its subject matter if this style is original in comparative historical terms it can manifest that special kind of aesthetic unity which we call art appreciation of this involves a heightened interaction of capacities such as imagination and understanding which are basic to knowledge and personal identity by negotiating these factors it is possible to define art and its canonic dimensions objectively and to show that aforementioned sceptical alternatives are incomplete and self contradictory

keune s research began with a nagging question could someone come to a saving faith in christ based on their interactions with an ai this simple question led to a thoroughgoing investigation of linguistics and hermeneutics and the criteria that an ai would need to satisfy the result is a linguistic hermeneutic ethical and sacramental investigation stressing the importance of the story formed community in authenticating performances of christian faith this work outlines the case that current ai systems are capable of inferential semantics as a result they can produce texts which are perceived as meaningful many hermeneutic and linguistic theories therefore are unable to help differentiate an ai from a human generated text which can lead to problematically unqualified conclusions the effective qualification of these conclusions can be provided by grounding hermeneutics in the narrative theology of a story formed community
