soft law increasingly shapes and impacts the content of international law in multiple ways from being a first step in a norm making process to providing detailed rules and technical standards required for the interpretation and the implementation of treaties this is especially true in the area of human rights while relatively few human rights treaties have been adopted at the un level in the last two decades the number of declarations resolutions conclusions and principles has grown significantly in some areas soft law has come to fill a void in the absence of treaty law exerting a degree of normative force exceeding its non binding character in others areas soft law has become a battleground for interpretative struggles to expand and limit human rights protection in the context of existing regimes despite these developments little attention has been paid to soft law within human rights legal scholarship building on a thorough analysis of relevant case studies this volume systematically explores the roles of soft law in both established and emerging human rights regimes the book argues that a better understanding of how soft law shapes and affects different branches of international human rights law not only provides a more dynamic picture of the current state of international human rights but also helps to unsettle and critically question certain political and doctrinal beliefs following introductory chapters that lay out the general conceptual framework the book is divided in two parts the first part focuses on cases that examine the role of soft law within human rights regimes where there are established hard law standards its progressive and regressive effects and the role that different actors play in the incubation process the second part focuses on the role of soft law in emerging areas of international law where there is no substantial treaty codification of norms these chapters examine the relationship between soft and hard law the role of different actors in formulating new soft law and the potential for eventual codification

according to the fbi about 4000 ransomware attacks happen every day in the united states alone victims lost 209 million to ransomware in the first quarter of 2016 even worse is the threat to critical infrastructure as seen by the malware infections at electrical distribution companies in ukraine that caused outages to 225 000 customers in late 2015 further recent reports on the russian hacks into the democratic national committee and subsequent release of emails in a coercive campaign to apparently influence the u s presidential election have brought national attention to the inadequacy of cyber deterrence the u s government seems incapable of creating an adequate strategy to alter the behavior of the wide variety of malicious actors seeking to inflict harm or damage through cyberspace this book offers a systematic analysis of the various existing strategic cyber deterrence options and introduces the alternative strategy of active cyber defense it examines the array of malicious actors operating in the domain their methods of attack and their motivations it

also provides answers on what is being done and what could be done by the government and industry to convince malicious actors that their attacks will not succeed and that risk of repercussions exists traditional deterrence strategies of retaliation denial and entanglement appear to lack the necessary conditions of capability credibility and communications due to these malicious actors advantages in cyberspace in response the book offers the option of adopting a strategy of active cyber defense that combines internal systemic resilience to halt cyber attack progress with external disruption capacities to thwart malicious actors objectives it shows how active cyber defense is technically capable and legally viable as an alternative strategy for the deterrence of cyber attacks

bachelor thesis from the year 2014 in the subject economics foreign trade theory trade policy grade a course economics international trade obesity corruption developing countries global south nestle pacific island nations language english abstract this research paper was written as my final honors thesis in economics i was questioning the somewhat sudden high rates of obesity found in many developing countries today i found several reasons for why obesity has sky rocketed in the global south finding that most trends leading to obesity derived from the western lifestyle one significant change between the western world and the developing world is that for the global south the transition to industrialization and development happened at a much faster pace the sudden modernization has in many places led to extreme changes in behavior and lifestyle the one

trend that reoccurred in most developing countries and had the highest effect on obesity rates was the infiltration of food products mostly from western food corporations. I look at some specific practices made by companies like Nestle and others as well as looking at behavioral changes in some of the worst hit areas like the Pacific Island Nations.
