in this book tony sammes and brian jenkinson show how information held in computer systems can be recovered and how it may be deliberately hidden or subverted for criminal purposes forensic computing a practitioner s guide is illustrated by plenty of case studies and worked examples and will help practitioners and students gain a clear understanding of how to recover information from computer systems in such a way as to ensure that its integrity cannot be challenged and that it will be accepted as admissible evidence in court the principles involved in password protection and data encryption the evaluation procedures used in circumventing these safeguards the particular legal issues associated with computer generated evidence and how to

ensure admissibility of such evidence

numerical linear algebra is far too broad a subject to treat in a single introductory volume stewart has chosen to treat algorithms for solving linear systems linear least squares problems and eigenvalue problems involving matrices whose elements can all be contained in the high speed storage of a computer by way of theory the author has chosen to discuss the theory of norms and perturbation theory for linear systems and for the algebraic eigenvalue problem these choices exclude among other things the solution of large sparse linear systems by direct and iterative methods linear programming and the useful perron frobenious theory and its extensions however a person who has fully mastered the material in this book should be well prepared for independent study in other areas of numerical linear algebra

the field of forensic computing is rapidly developing due to its increased importance this book covers forensic computing analysis and its capabilities of searching finding and presenting any form of digital document as admissible evidence in a court of law

lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the nasa scientific and technical information database
