a unified general theory of functional cognition is presented in this book its generality appears in the titles of the 13 chapters listed below its unity appears in the effectiveness of the same methods and concepts across all of these areas generality and unity both stem from the foundation axiom of purposiveness the axiom of purposiveness has been made effective through capability for functional measurement of values which embody the goal directed character of purposiveness this measurement capability is based on the general cognitive algebra established in information integration theory functional theory can thus be made precise and effective near the level of everyday phenomenology the book is written at a relatively simple level directed at readers in every field of psychology among its characteristics are self sufficient theory near the level of everyday phenomenology foundation on structure of the internal world and solid grounding in experimental analysis

this volume contains revised and expanded versions of those papers from the 1990 functional grammar conference in copenhagen that contributed specifically to the current investigation of clause structure in terms of semantic layers one of the key concepts in this discussion is reference some papers discuss ways in which previous accounts of reference need to be expanded and differentiated to provide a consistent picture of referential properties the power of layered analysis to bring out fundamental similarities between languages of very different types is the theme of another group of papers again with the referential properties of constituents playing a central role by some contributors layered analysis is challenged and the question is raised as to how it might fit into a dynamic and pragmatic picture of language the book is rounded off by a comparison between layered structure in functional grammar and in government and binding theory

this volume presents a functional perspective on grammatical relations grs without neglecting their structural correlates ever since the 1970s the discussion of rgs by functionally oriented linguists has focused primarily on their functional aspects such as reference cognitive accessibility and discourse topicality with some exceptions functionalists have thus ceded the discussion of the structural correlates of grs to various formal schools ever since edward keenan s pioneering work on subject properties 1975 1976 it has been apparent that subjecthood and objecthood can only be described properly by a basket of neither necessary nor sufficient properties thus within a framework akin to rosch s theory of prototype some gr properties are functional reference topicality accessibility others involve overt coding word order case marking verb agreement others yet are more abstract involving control of grammatical processes rule governed behavior building on keenan s pioneering work this volume concentrates on the structural aspects of grs within a functionalist framework following a theoretical introduction the papers in the volume deal primarily with recalcitrant typological issues the dissociation between overt coding properties of grs and their behavior and control properties grs in serial verb constructions grs in ergative languages the impact of clause union and grammaticalization on grs

examines the political history of administrative reform undertaken by 20th century presidents attempting to explain the growth of modern bureaucracy within an 18th century framework and the expansion of presidential control over administrative powers the author explores the relationship between administrative theory and the dilemmas posed for a developing administrative state by the separation of powers he also looks at and compares successive cases of presidentially initiated comprehensive reform planning in order to understand the implications for the president s institutional role paper edition unseen 25 00 annotation copyrighted by book news inc portland or

this book examines the fundamental role of politics in funding our public schools and fills a conceptual imbalance in the current literature in school finance and educational policy unlike those who are primarily concerned about cost efficiency kenneth wong specifies how resources are allocated for what purposes at different levels of the government in contrast to those who focus on litigation as a way to reduce funding gaps he underscores institutional stalemate and the lack of political will to act as important factors that affect legislative deadlock in school finance reform wong defines how politics has sustained various types of rules that affect the allocation of resources at the federal state and local level while these rules have been remarkably stable over the past twenty to thirty years they have often worked at cross purposes by fragmenting policy and constraining the education process at schools with the greatest needs wong s examination is shaped by several questions how do these rules come about what role does politics play in retention of the rules do the federal state and local governments espouse different policies in what ways do these policies operate at cross purposes how do they affect educational opportunities do the policies cohere in ways that promote better and more equitable student outcomes wong concludes that the five types of entrenched rules for resource allocation are rooted in existing governance arrangements and seemingly impervious to partisan shifts interest group pressures and constitutional challenge and because these rules foster policy fragmentation and embody initiatives out of step with the performance based reform agenda of the 1990s the outlook for positive change in public education is uncertain unless fairly radical approaches are employed wong also analyzes four allocative reform models two based on the assumption that existing political structures are unlikely to change and two that seek to empower actors at the school level the two models for systemwide restructuring aimed at intergovernmental coordination and or integrated governance would seek to clarify responsibilities for public education among federal state and local authorities above all integrating political and educational accountability the other two models identified by wong shift control from state and district to the school one based

on local leadership and the other based on market forces in discussing the guiding principles of the four models wong takes care to identify both the potential and limitations of each written with a broad policy audience in mind wong s book should appeal to professionals interested in the politics of educational reform and to teachers of courses dealing with educational policy and administration and intergovernmental relations
